

Scorecard for Accountability and Action

The entire population of Guinea is at high risk of malaria. The annual reported number of malaria cases in 2012 was 1,233,036 with 332 deaths.

Metrics

Policy and Financial Control	
Oral Artemisinin Based Monotherapy Ban status (2014)	Target achieved or on track
Community case management (Pneumonia)	Target achieved or on track
Community case management (Malaria)	Target achieved or on track
World Bank rating on public sector mgmt and institutions 2012 (CPIA Cluster D)	Not on track 2.6
Commodities Financed, Implementation and Malaria Impact	
LLIN financing 2014 projection (% of need)	Progress but more effort required 83
Public sector RDT financing 2014 projection (% of need)	Progress but more effort required 41
Public sector ACT financing 2014 projection (% of need)	Progress but more effort required 51
Operational LLIN/IRS coverage (% of at risk population)	Target achieved or on track 100
On track in 2012 to Reduce Malaria Incidence by >75% by 2015 (vs 2000)	Progress but more effort required
Tracer Indicators for Maternal and Child Health	
PMTCT coverage 2012 (% pregnant HIV pts receiving ARVs)	Progress but more effort required 44
% deliveries assisted by skilled birth attendant	Progress but more effort required 46
Exclusive breastfeeding (% children < 6 months)	Progress but more effort required 48
Vitamin A Coverage (2 doses)	Target achieved or on track 88
DPT3 coverage 2011 (vaccination among 12-23 month olds)	Progress but more effort required 59
Postnatal care (within 48 hrs)	No data/Not applicable

Urgent Global Fund Update

The Global Fund has announced that Guinea will receive US\$ 129.9 million for HIV, tuberculosis, malaria, and health systems strengthening as the country allocation under the New Funding Model. The total figure includes all existing, unspent funds from previous rounds and the Interim New Funding Model. The Global Fund has determined the total allocation amount based on Guinea's disease burden and income level, as well as several other factors. The malaria component is also allocated a specific proportion of the total, according to a formula developed by the Global Fund that takes into account several factors, including disease burden and previous disbursements. For Guinea this is calculated at US\$ 70.7 million, including US\$ 53.7 million of new resources. The allocations to the individual disease components are not fixed, and can be adjusted according to decisions made at country level. Guinea is urged to ensure that resources are allocated to malaria control from the overall Global Fund country allocation at a level that is sufficient to sustain the gains made in recent years.

Progress

Guinea has banned oral artemisinin-based monotherapies and has introduced a policy on Community Case Management of malaria and pneumonia. Resources have been mobilised through the Global Fund and sufficient LLINs have been distributed to achieve 100% operational coverage. Guinea has achieved a 58% reduction in under-five child mortality since 1990.

Impact

The annual reported number of malaria cases in 2012 was 1,233,036 with 332 deaths. Progress in reducing cases has been reported sub-nationally where interventions have been intensified.

Key Challenge

- Limited number of partners involved in the financing and implementation of programme activities.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ¹ : Optimise quality of care	Prioritise the collection of postnatal care data	Q1 2014		The country recommends postnatal follow up contacts by a trained provider for mother and newborn and recommends Kangaroo Mother Care for low birth weight newborns

¹ MNCH metrics, recommended actions and response tracked through WHO MCA/iERG

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Address funding	Ensure the NFM concept note is submitted by Q4 2014 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years	Q4 2014
