

Scorecard for Accountability and Action

Malaria is endemic throughout Senegal. The annual reported number of malaria cases in 2009 was 222,232 with 574 deaths.

Metrics

Policy and Financial Control		
Oral Artemisinin Based Monotherapy Ban status (2014)		
Community case management (Pneumonia)		
Community case management (Malaria)		
World Bank rating on public sector mgmt and institutions 2012 (CPIA Cluster D)		3.6
Commodities Financed, Implementation and Malaria Impact		
LLIN financing 2014 projection (% of need)		100
Public sector RDT financing 2014 projection (% of need)		
Public sector ACT financing 2014 projection (% of need)		
Operational LLIN/IRS coverage (% of at risk population)	▼	62
On track in 2012 to Reduce Malaria Incidence by >75% by 2015 (vs 2000)		
Tracer Indicators for Maternal and Child Health		
PMTCT coverage 2012 (% pregnant HIV pts receiving ARVs)		
% deliveries assisted by skilled birth attendant		65
Exclusive breastfeeding (% children < 6 months)		39
Vitamin A Coverage (2 doses)		
DPT3 coverage 2011 (vaccination among 12-23 month olds)		83
Postnatal care (within 48 hrs)		68

### Urgent Global Fund Update

The Global Fund has announced that Senegal will receive US\$ 123.7 million for HIV, tuberculosis, malaria, and health systems strengthening as the country allocation under the New Funding Model. The total figure includes all existing, unspent funds from previous rounds and the Interim New Funding Model. The Global Fund has determined the total allocation amount based on Senegal's disease burden and income level, as well as several other factors. The malaria component is also allocated a specific proportion of the total, according to a formula developed by the Global Fund that takes into account several factors, including disease burden and previous disbursements. For Senegal this is calculated at US\$ 62.4 million, including US\$ 9.2 million of new resources. The allocations to the individual disease components are not fixed, and can be adjusted according to decisions made at country level. Senegal is urged to ensure that resources are allocated to malaria control from the overall Global Fund country allocation at a level that is sufficient to sustain the gains made in recent years.

### Progress

Senegal has made good progress in malaria control. The country has banned oral artemisinin-based monotherapies and introduced policies on Community Case Management for malaria and pneumonia. Senegal has achieved high coverage of tracer MNCH interventions including postnatal care and DPT3 vaccination. Senegal has reduced the under-five mortality rate by 58% since 1990. The country has significantly enhanced the tracking and accountability mechanisms with the development of the Reproductive, Maternal, Newborn and Child Health Scorecard.

### Impact

Senegal has not provided updated malaria data in 2012 to WHO.

### Key Challenge

- Sustaining the impressive progress made in control and reduction of malaria burden.

### Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Optimise quality of care	Ensure LLINs currently under procurement are distributed as quickly as possible in order to address decreasing LLIN coverage	Q2 2014		Deliverable not yet due but 181,000 LLINs procured in the last quarter of 2013
Enhance data quality and analysis	Ensure that data on malaria cases and deaths are collected through the routine information system and submitted to WHO	Q4 2014		The HMIS is reported to be fully functional by the end of quarter 1 2014

## New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Address funding	Ensure the NFM concept note is submitted by Q4 2014 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years	Q4 2014
