

Scorecard for Accountability and Action

Metrics

Policy and Financial Control	
Oral Artemisinin Based Monotherapy Ban status (2014)	Target achieved or on track
Community case management (Pneumonia)	Target achieved or on track
Community case management (Malaria)	No data/Not applicable
World Bank rating on public sector mgmt and institutions 2012 (CPIA Cluster D)	2.2
Commodities Financed, Implementation and Malaria Impact	
LLIN financing 2014 projection (% of need)	59
Public sector RDT financing 2014 projection (% of need)	46
Public sector ACT financing 2014 projection (% of need)	100
Operational LLINIRS coverage (% of at risk population)	51
On track in 2012 to Reduce Malaria Incidence by >75% by 2015 (vs 2000)	Progress but more effort required
Tracer Indicators for Maternal and Child Health	
PMTCT coverage 2012 (% pregnant HIV pts receiving ARVs)	No data/Not applicable
% deliveries assisted by skilled birth attendant	23
Exclusive breastfeeding (% children < 6 months)	41
Vitamin A Coverage (2 doses)	No data/Not applicable
DPT3 coverage 2011 (vaccination among 12-23 month olds)	93
Postnatal care (within 48 hrs)	No data/Not applicable

Malaria transmission in Sudan is low-to-moderate and occasionally epidemic. The annual reported number of malaria cases in 2012 was 964,698 with 618 deaths.

Urgent Global Fund Update

The Global Fund has announced that Sudan will receive US\$ 164.8 million for HIV, tuberculosis, malaria and health systems strengthening as the country allocation under the New Funding Model. The total figure includes all existing, unspent funds from previous rounds and the Interim New Funding Model. The Global Fund has determined the total allocation amount based on Sudan's disease burden and income level, as well as several other factors. The malaria component is also allocated a specific proportion of the total, according to a formula developed by the Global Fund that takes into account several factors, including disease burden and previous disbursements. For Sudan this is calculated at US\$ 98.6 million, including US\$ 15.5 million of new resources. The allocations to the individual disease components are not fixed, and can be adjusted according to decisions made at country level. Sudan is urged to ensure that resources are allocated to malaria control from the overall Global Fund country allocation at a level that is sufficient to sustain the gains made in recent years.

Progress

Sudan has made steady progress in scaling-up malaria control interventions and has, in particular, been successful in attracting resources through the Global Fund, including through Round 10. The country has also introduced Community Case Management for the treatment of malaria and banned oral artemisinin-based monotherapies. Sudan has achieved high coverage of the tracer MNCH indicator DPT3 vaccination.

Impact

Reports from the Ministry of Health show a decline in reported malaria deaths from the levels in 2000. Progress in reducing cases has been reported sub-nationally where interventions have been intensified. The annual reported number of malaria cases in 2012 was 964,698 with 618 deaths.

Key Challenge

- Delays in disbursement of funds.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ¹ Optimise quality of care	Prioritise collection of postnatal care data	Q1 2014		Postpartum vitamin A supplementation for mothers is used as a proxy indicator to measure postnatal care. Postpartum Vitamin A supplementation has increased from 18.5% in 2006 to 22% in 2010

¹ MNCH metrics, recommended actions and response tracked through WHO MCA/iERG

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Address funding	Ensure the NFM concept note is submitted by Q3 2014 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years	Q3 2014
