There is intense malaria transmission all year round in the Central African Republic and the entire population of the country is at high risk. The annual reported number of malaria cases in 2013 was 407,131 with 1,026 deaths.
Progress
Central African Republic has established a policy for Community Case Management of malaria and more recently, pneumonia. The country has also banned the import and sale of oral artemisinin-based monotherapies. The universal coverage campaign for LLINs is rolling out and will result in universal coverage of at risk populations. The country has made good progress in the tracer MNCH intervention of vitamin A coverage. Central African Republic was awarded the 2015 ALMA Awards for Excellence in Implementation of Vector Control and for Most Improved in Malaria Control.

Impact
The annual reported number of malaria cases in 2013 was 407,131 with 1,026 deaths.

Key Challenge
- Limited access to some at-risk populations is hampering malaria coverage.
