The entire population of Sierra Leone is at high risk of malaria. The annual reported number of malaria cases in 2013 was 1,715,851 with 4,326 deaths.

Metrics

### Policy and Financial Control
- Oral Artesunate Based Monotherapy Ban status (2015)
- Community case management (Pneumonia) (2015)
- Community case management (Malaria) (2015)
- World Bank rating on public sector mgmt and institutions 2013 (CPIA Cluster D)

### Commodities Financed, Implementation and Malaria Impact
- LLIN financing 2015 projection (% of need)
- Public sector RDT financing 2015 projection (% of need)
- Public sector ACT financing 2015 projection (% of need)
- Operational LLIN/IRS coverage (% of at risk population)
- On track in 2013 to Reduce Malaria Incidence by >75% by 2015 (vs 2000)

### Tracer Indicators for Maternal and Child Health
- PMTCT coverage 2013 (% pregnant HIV pts receiving ARVs)
- % deliveries assisted by skilled birth attendant
- Exclusive breastfeeding (% children < 6 months)
- Vitamin A Coverage 2012 (2 doses)
- DTP3 coverage 2012 (vaccination among 12-23 month olds)
- Postnatal care (within 48 hrs)

Key

- Target achieved or on track
- Progress but more effort required
- Not on track
- No data/Not applicable
Sierra Leone ALMA Quarterly Report  
Quarter One, 2015

Progress
Sierra Leone has banned oral artemisinin-based monotherapies and has introduced policies on Community Case Management for both malaria and pneumonia. The country has secured sufficient resources to achieve universal coverage of LLINs, RDTs, and ACTs in 2015. Despite the ebola outbreak, Sierra Leone has completed the universal coverage campaign for LLINs. The country has made significant progress in tracer MNCH interventions including in PMTCT and exclusive breastfeeding and has high coverage of vitamin A and DPT3 vaccination. The country has recently increased coverage of postnatal care. Sierra Leone has enhanced the tracking and accountability mechanisms with the development of the Reproductive, Maternal, Newborn and Child Health Scorecard. Sierra Leone has made significant efforts to mitigate the impact of the current ebola crisis on malaria control. The LLIN universal coverage campaign was completed in September including in ebola affected areas and the country is conducting Mass Drug Administration with antimalarial medicine to reduce the overall incidence of fever. Sierra Leone was awarded a 2015 ALMA Award for Most Improved in Malaria Control.

Impact
The annual reported number of malaria cases in 2013 was 1,715,851 with 4,326 deaths.

Key Challenge
• Sustaining the coverage of essential health services during the ebola outbreak.
