

Scorecard for Accountability and Action

Malaria transmission is seasonal in almost all areas of Mozambique. The annual reported number of malaria cases in 2012 was 1,813,984 with 2,818 deaths.

Metrics

Policy and Financial Control	
Oral Artemisinin Based Monotherapy Ban status (2014)	
Community case management (Pneumonia)	
Community case management (Malaria)	
World Bank rating on public sector mgmt and institutions 2013 (CPIA Cluster D)	3.3
Commodities Financed, Implementation and Malaria Impact	
LLIN financing 2014 projection (% of need)	100
Public sector RDT financing 2014 projection (% of need)	93
Public sector ACT financing 2014 projection (% of need)	100
Operational LLIN/IRS coverage (% of at risk population)	86
On track in 2012 to Reduce Malaria Incidence by >75% by 2015 (vs 2000)	
Tracer Indicators for Maternal and Child Health	
PMTCT coverage 2012 (% pregnant HIV pts receiving ARVs)	86
% deliveries assisted by skilled birth attendant	54
Exclusive breastfeeding (% children < 6 months)	43
Vitamin A Coverage 2012 (2 doses)	20
DPT3 coverage 2012 (vaccination among 12-23 month olds)	76
Postnatal care (within 48 hrs)

Mozambique ALMA Quarterly Report Quarter Two, 2014

Progress

Mozambique has made steady progress in scaling-up malaria control interventions and has, in particular, been successful in attracting resources through the Global Fund to procure the required antimalarial commodities. Additionally, the country has made policy changes including the banning of oral artemisinin-based monotherapies. Policies on Community Case Management of malaria and pneumonia have been introduced. The country has secured sufficient financing to sustain universal coverage of ACTs, RDTs, and LLINs in 2014. Mozambique has also achieved high coverage of the tracer MNCH indicator PMTCT. Mozambique has demonstrated a 61% decline in the under-five mortality rate since 1990. The country has significantly enhanced the tracking and accountability mechanisms with the development of the Reproductive, Maternal, Newborn and Child Health Scorecard.

Impact

The annual reported number of malaria cases in 2012 was 1,813,984 with 2,818 deaths.

Key Challenge

- High staff turnover in recent years is affecting programme efficiency.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address funding	Ensure the NFM concept note is submitted by Q4 2014 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years	Q4 2014		Deliverable not yet due but country has begun the preparation of the GF NFM concept note

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
MNCH ¹ : Optimise quality of care	Identify and address reasons for decreasing vitamin A coverage	Q2 2015

Key

	Action achieved
	Some progress
	No progress
	Deliverable not yet due
