

Scorecard for Accountability and Action

Nearly 50% of the population of Djibouti is at low risk of malaria, while the remaining in the desert is free of malaria. The annual reported number of malaria cases in 2017 was 14,671.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2019 projection (% of need)	0
Public sector RDT financing 2019 projection (% of need)	100
Public sector ACT financing 2019 projection (% of need)	100
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)	2.7
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2017)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in Estimated Malaria Incidence(2010–2017)	
Change in Estimated Malaria Mortality rate(2010–2017)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2018)	30
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2018)	10
% deliveries assisted by skilled birth attendant	87
Postnatal care (within 48 hrs)	
Exclusive breastfeeding (% children < 6 months)	12
Vitamin A Coverage 2017 (2 doses)	
DPT3 coverage 2017 (vaccination among 0-11 month olds)	68

Malaria

Progress

Djibouti has secured sufficient resources to fund the ACTs and RDTs required for 2019 and has secured resources for IRS. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Djibouti has decreased the estimated malaria incidence and mortality rates by more than 40% since 2010.

Key challenges

- Increases in malaria cases have been experienced in the country since 2015.
- Lack of resources to fully implement vector control 2018-2020, including the LLINs required to complement the IRS.

Impact

The annual reported number of malaria cases in 2017 was 14,671.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Investigate and address the reasons for the increase in malaria cases	Q4 2018		Djibouti has declared a malaria emergency and has prepared an emergency response plan. The country has secured emergency resources from the Global Fund for ACTs, RDTs and LLINs. The country is also working on an innovative communication strategy

The country has responded to the recommended action on finalising the insecticide resistance management and monitoring plan, and continues to track progress as this action is implemented.

RMNCAH and NTDs

Progress

Djibouti has achieved high coverage of the tracer RMNCAH intervention skilled birth attendants.

Progress in addressing Neglected Tropical Diseases (NTDs) in Djibouti is measured using a composite index calculated from preventive chemotherapy coverage achieved for soil transmitted helminths. The country has not submitted data on preventive chemotherapy coverage for soil transmitted helminths to WHO.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Optimise quality of care	Identify and address reasons for the decrease in coverage of DPT3	Q2 2018		The country reported an increase in DPT3 coverage in 2018
NTDs	Take steps to confirm the epidemiological situation of Soil Transmitted Helminths and Schistosomiasis to determine the extent to which interventions for preventive chemotherapy are required. For trachoma, should Djibouti wish to submit a dossier to be validated as having eliminated trachoma as a public health problem, begin compiling data using the WHO Dossier preparation guidelines	Q1 2019		The country received funds from ESPEN to support the NTD programme to conduct the mapping and is working to complete the implementation plan

Djibouti has responded positively to the RMNCAH recommended action addressing low coverage of exclusive breastfeeding and the country continues to track progress as this action is implemented. Djibouti has responded positively to the RMNCAH recommended action addressing lack of data on postnatal care coverage and low coverage of ARTs, with small increases recently reported and continues to track progress as these actions are implemented.
