## Progress

Burundi has made good progress in scaling-up coverage of key malaria control interventions, in particular LLINs. Burundi has banned oral artemisinin-based monotherapies and has introduced a policy of Community Case Management of pneumonia and malaria. Burundi has procured sufficient LLINs to achieve universal coverage. Burundi has achieved high coverage of tracer MNCH interventions, including exclusive breastfeeding and DPT3 coverage.

## Impact

The annual reported number of malaria cases in 2012 was 2,151,076 with 2,263 deaths.

## Key Challenge

- Weaknesses in data quality to monitor the progress on malaria control.

## Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address funding	Ensure the NFM concept note is submitted by Q1 2015 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years	Q1 2015		Deliverable not yet due but country has begun work on the GF NFM concept note with a plan to submit in November 2014
