### **Progress**

Senegal has made good progress in malaria control. The country has banned oral artemisinin-based monotherapies and introduced policies on Community Case Management for malaria and pneumonia. The country has secured sufficient resources to sustain universal coverage of essential malaria control interventions in 2015. Senegal has achieved high coverage of the tracer MNCH interventions DPT3 vaccination and has recently increased coverage of postnatal care. The country has significantly enhanced the tracking and accountability mechanisms with the development of the Reproductive, Maternal, Newborn and Child Health Scorecard.

### **Impact**

The annual reported number of malaria cases in 2013 was 772,222 with 815 deaths.

### **Key Challenge**

- Sustaining the impressive progress made in control and reduction of malaria burden.

### **Recommended Action**

Senegal has responded positively to the recommended action addressing the lack of data on vitamin A and continues to track progress as this action is implemented.
