

Scorecard for Accountability and Action

Malaria transmission occurs all year round throughout Côte d'Ivoire, although it is more seasonal in the north of the country. The annual reported number of malaria cases in 2017 was 3,391,967 with 3,222 deaths.

Metrics

Commodities Financed and Financial Control		
LLIN financing 2019 projection (% of need)	100	100
Public sector RDT financing 2019 projection (% of need)	100	100
Public sector ACT financing 2019 projection (% of need)	100	100
World Bank rating on public sector management and institutions 2018 (CPIA Cluster D)	3.3	
Insecticide Resistance Monitoring, Implementation and Impact		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4	
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
Scale of Implementation of iCCM (2017)		
Operational LLIN/IRS coverage (% of at risk population)	100	
Change in Estimated Malaria Incidence(2010–2017)		
Change in Estimated Malaria Mortality rate(2010–2017)		
Tracer Indicators for Maternal and Child Health and NTDs		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	75	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2018)	55	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2018)	40	
% deliveries assisted by skilled birth attendant	74	
Postnatal care (within 48 hrs)	80	
Exclusive breastfeeding (% children < 6 months)	12	
Vitamin A Coverage 2017 (2 doses)	94	
DPT3 coverage 2018 (vaccination among 0-11 month olds)	82

Malaria

Progress

Côte d'Ivoire has successfully raised resources for the financing of LLINs, RDTs, and ACTs in 2019 and has procured enough LLINs to achieve universal operational coverage of the targeted at risk population with LLINs. The country has also scaled up implementation of iCCM, Côte d'Ivoire has recently reported the results of insecticide resistance testing to WHO. The country has decreased the estimated malaria incidence and mortality rates by more than 40% since 2010. Côte d'Ivoire has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard.

Impact

The annual reported number of malaria cases in 2017 was 3,391,967 with 3,222 deaths.

RMNCAH and NTDs

Progress

The country has made progress on the tracer RMNCAH intervention of postnatal care, and has recently increased coverage of vitamin A and of ARTs. Côte d'Ivoire has enhanced tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Côte d'Ivoire is measured using a composite index calculated from preventive chemotherapy coverage achieved for onchocerciasis, schistosomiasis, soil transmitted helminths, lymphatic filariasis and trachoma. Preventive chemotherapy coverage in Côte d'Ivoire is high for onchocerciasis (100%), schistosomiasis (94%) and soil transmitted helminths (92%). Coverage for lymphatic filariasis is good (72%) and for trachoma it is 38%. Overall, the NTD preventive chemotherapy coverage index for Côte d'Ivoire in 2017 is 75 and this represents substantial increase compared with the 2016 index value (69).

Previous Key Recommended Action

Côte d'Ivoire has responded positively to the RMNCAH recommended action addressing low coverage of exclusive breastfeeding, and continues to track progress as this action is implemented.
