Nearly 50% of the population of Djibouti is at low risk of malaria, while the remaining in the desert is free of malaria. The annual reported number of malaria cases in 2017 was 14,671.
Malaria

Progress
Djibouti has secured sufficient resources to fund the ACTs and RDTs required for 2019 and has secured resources for IRS. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Djibouti has decreased the estimated malaria incidence and mortality rates by more than 40% since 2010. The country has recently increased the quality of their public sector management systems (CPIA cluster D).

Key challenge
- Increases in malaria cases have been experienced in the country since 2015.

Impact
The annual reported number of malaria cases in 2017 was 14,671.

<td>Q4 2018</td>
<td>Green</td>
<td>Djibouti declared a malaria emergency and prepared an emergency response plan. The country secured emergency resources from the Global Fund for ACTs, RDTs and LLINs. The Ministry of Health is rolling out vector control including LLINs and IRS. In addition, the country held a round table for resource mobilization which resulted in funding pledges from a number of partner organizations. The number of cases has significantly reduced.</td>

The country has responded to the recommended action on finalising the insecticide resistance management and monitoring plan, and continues to track progress as this action is implemented.

RMNCAH and NTDs

Progress
Djibouti has achieved high coverage of the tracer RMNCAH intervention skilled birth attendants.

Progress in addressing Neglected Tropical Diseases (NTDs) in Djibouti is measured using a composite index calculated from preventive chemotherapy coverage achieved.
for soil transmitted helminths. The country has not submitted data on preventive chemotherapy coverage for soil transmitted helminths to WHO.
