

### Scorecard for Accountability and Action

The entire population of The Gambia is at high risk of malaria and transmission is intense for most of the year. The annual reported number of malaria cases in 2017 was 75,559 with 54 deaths.

#### Metrics

Commodities Financed and Financial Control	
LLIN financing 2019 projection (% of need)	100
Public sector RDT financing 2019 projection (% of need)	100
Public sector ACT financing 2019 projection (% of need)	100
World Bank rating on public sector management and institutions 2018 (CPIA Cluster D)	3.0
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2015 and data reported to WHO	▲
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2017)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in Estimated Malaria Incidence(2010–2017)	
Change in Estimated Malaria Mortality rate(2010–2017)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	72
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2018)	29
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2018)	30
% deliveries assisted by skilled birth attendant	57
Postnatal care (within 48 hrs)	76
Exclusive breastfeeding (% children < 6 months)	47
Vitamin A Coverage 2017 (2 doses)	32
DPT3 coverage 2018 (vaccination among 0-11 month olds)	93

#### Key

	Target achieved or on track
	Progress but more effort required
	Not on track
	No data
	Not applicable

## **Malaria**

### **Progress**

The Gambia has secured resources to finance the malaria commodities required for 2019. The country has procured sufficient LLINs and carried out IRS to sustain 100% operational coverage of the targeted at risk population. The Gambia has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard. The country has recently submitted the results of insecticide resistance monitoring to WHO. The Gambia has decreased the estimated malaria mortality rate by more than 40% since 2010.

### **Impact**

The annual reported number of malaria cases in 2017 was 75,559 with 54 deaths.

### **Key Challenge**

- The country has funding gaps preventing the further scale up of IRS.

## **RMNCAH and NTDs**

### **Progress**

The country has achieved high coverage of the tracer RMNCAH interventions postnatal care and DPT3 vaccination. The Gambia has significantly enhanced the tracking and accountability mechanisms with the development of the Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in The Gambia is measured using a composite index calculated from preventive chemotherapy coverage achieved for schistosomiasis, soil transmitted helminths, and trachoma. Preventive chemotherapy coverage in Gambia is high for trachoma (100%), schistosomiasis (85%) and low for soil transmitted helminths (44%). The NTD preventive chemotherapy coverage index for Gambia in 2017 is 72, which represents a very substantial increase compared with the 2016 index value (8).

### **Previous Key Recommended Actions**

The Gambia has responded positively to the RMNCAH recommended action addressing the low coverage of ARTs and vitamin A, with increases in coverage recently achieved in both interventions, and continues to track progress as these actions are implemented.
