In Mauritania, almost 15% of the population is at high risk and 75% is at low risk of malaria. The annual reported number of malaria cases in 2014 was 156,529 with 19 deaths.
Mauritania ALMA Quarterly Report
Quarter One, 2016

Malaria
Progress
Mauritania has secured sufficient resources to meet the LLIN, ACT, and RDT requirements for 2016.

Impact
The annual reported number of malaria cases in 2014 was 156,529 with 19 deaths. WHO, through modeling, projects that the country will reduce the malaria incidence by more than 75% for the period between 2000 and 2015.

Key Challenge
- Low LLIN coverage.

New Key Recommended Action

<tr>
<td>Vector Control</td>
<td>Report to WHO on the status of insecticide resistance, resistance monitoring and on the status of the national insecticide resistance monitoring and management plan</td>
<td>Q1 2017</td>
</tr>
</tbody>
</table>

MNCH
Progress
The country has also made good progress in the tracer MNCH intervention of vitamin A coverage and DPT3 vaccination coverage.
