Malaria transmission in Chad is intense in the south of the country. The annual reported number of malaria cases in 2014 was 1,513,772 with 1,720 deaths.
**Malaria**

**Progress**
Chad has carried out insecticide resistance monitoring since 2014 and has reported the results to WHO. The country has also scaled up iCCM implementation.

**Impact**
The annual reported number of malaria cases in 2014 was 1,513,772 with 1,720 deaths. WHO, through modeling, estimates that there has been a less than 50% decrease in malaria incidence between 2000 and 2015.

**Key Challenge**
- Weak health information system.

**MNCH**

**Progress**
Chad has achieved high coverage in the tracer MNCH intervention, vitamin A coverage. The country has enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn and Child Health Scorecard.

<tr>
<td>MNCH¹: Optimise quality of care</td>
<td>Work to accelerate coverage of ARTs in children under 14 years of age</td>
<td>Q1 2017</td>
<td></td>
<td>Deliverable not yet due but Chad has increased ART coverage by 7% in the total population and by 5% in children</td>
</tr>
</tbody>
</table>

Chad has responded positively to the MNCH recommended actions addressing low coverage of skilled birth attendants, which have since increased coverage. Additionally, the country has responded positively to the recommended actions for exclusive breastfeeding and the lack of data for postnatal care and continues to track progress as these actions are implemented.

**Key**

- Action achieved
- Some progress
- No progress
- Deliverable not yet due
