Malaria transmission occurs all year round throughout Côte d’Ivoire, although it is more seasonal in the north of the country. The annual reported number of malaria cases in 2014 was 4,658,774 with 2,069 deaths.
Côte d’Ivoire ALMA Quarterly Report
Quarter Three, 2016

Malaria

Progress
Côte d’Ivoire has successfully raised resources for the financing of the required number of LLINs, RDTs, and ACTs in 2016 and has procured enough LLINs to achieve universal coverage of LLINs in 2016.

Impact
The annual reported number of malaria cases in 2014 was 4,658,774 with 2,069 deaths. WHO, through modeling, estimates that there has been a less than 50% decrease in malaria incidence between 2000 and 2015.

Key Challenge
• Securing longer term resources for malaria programming.

<td>MNCH¹: Optimise quality of care</td>
<td>Work to accelerate coverage of ARTs in the total population and in children under 14 years of age</td>
<td>Q1 2017</td>
<td></td>
<td>Côte d'Ivoire has increased ART coverage by 8% in the total population and by 1% in children and is aiming to achieve 46% coverage in adults and 35% coverage in children in 2016. Côte d'Ivoire is shifting the testing policy to case-finding of HIV positive children and is working to enhance community engagement. Providers of nursing services and midwives are being trained in task-shifting for ART prescription and patient monitoring, to increase the number of health care providers capable of managing the increasing numbers of patients</td>
