

Scorecard for Accountability and Action

Malaria transmission is confined to the north-east part of Namibia where malaria is endemic and about 72% of the population of the country is at risk. The annual reported number of malaria cases in 2014 was 15,692 with 61 deaths.

Metrics

Commodities Financed and Financial Control

IRS financing 2016 (% of at-risk population)	100
Public sector RDT financing 2016 projection (% of need)	100
Public sector ACT financing 2016 projection (% of need)	100
World Bank rating on public sector management and institutions 2015 (CPIA Cluster D)	

Insecticide Resistance Monitoring, Implementation and Impact

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	0
Insecticide resistance monitored since 2014 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of ICCM (2013)	
IRS Operational Coverage (%)	76
>75% Decrease in Malaria Incidence Projected 2000–2015	

Tracer Indicators for Maternal and Child Health

Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2015)	69
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2015)	95
% deliveries assisted by skilled birth attendant	88
Postnatal care (within 48 hrs)	65
Exclusive breastfeeding (% children < 6 months)	49
Vitamin A Coverage 2014 (2 doses)	
DPT3 coverage 2015 (vaccination among 0-11 month olds)	92

Malaria

Progress

Namibia has secured sufficient funding for the required number of anti-malaria drugs, RDTs, LLINs, and IRS for 2016. The country has carried out insecticide resistance monitoring since 2014 and has reported the results to WHO. Namibia was awarded a 2016 ALMA Award for Excellence for achieving the Millennium Development Goals (MDGs) target for malaria. Namibia has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard.

Impact

Namibia has made significant progress in the fight against malaria. The number of probable and confirmed malaria cases reported annually decreased from 480,515 during 2001–2005 to only 15,692 cases in 2014. During the same period, a similar trend was observed in deaths: malaria deaths fell from 1,370 to 61. As such, the country has achieved the global MDG target of more than a 75% reduction in the malaria burden since 2000. However the number of malaria cases in 2014 increased to 15,692 compared to 4,745 in 2013 and deaths increased in 2014 to 61 compared to 21 in 2013.

Key Challenges

- Maintaining malaria high on the political and funding agenda as the disease burden continues to drop.
- There is a need to strengthen cross border collaboration with neighbouring countries.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Vector control	Share the status of the national insecticide resistance monitoring and management plan with WHO	Q1 2017		Namibia plans to finalise the national insecticide resistance monitoring and management plan in Q4 2016

Namibia has responded positively to the recommended action addressing the lack of data on iCCM and continues to strengthen access to treatment of malaria, pneumonia and diarrhea.

MNCH

Progress

Namibia has good coverage of tracer MNCH interventions, including DPT3, ART coverage in the total population and in children under 14 years of age, skilled birth attendants and postnatal care. The country has enhanced tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn and Child Health Scorecard.

Previous Key Recommended Action

Namibia has responded positively to the MNCH recommended action addressing the lack of data on vitamin A coverage and continues to track progress as this action is implemented.
