

### Scorecard for Accountability and Action

The entire population of Equatorial Guinea is at high risk of malaria and the transmission is intense all year round. The annual reported number of malaria cases in 2019 was 83,396 and 15 deaths.

#### Metrics

##### Commodities Financed and Financial Control

LLIN financing 2020 projection (% of need)		
Public sector RDT financing 2020 projection (% of need)		
Public sector ACT financing 2020 projection (% of need)		
World Bank rating on public sector management and institutions 2019 (CPIA Cluster D)		

##### Insecticide Resistance Monitoring, Implementation and Impact

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		2
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>9 months stock)		
ACTs in stock (>9 months stock)		
LLIN/IRS campaign on track		
Country Reporting Launch of Zero Malaria Starts with Me Campaign		
Scale of Implementation of iCCM		
Operational LLIN/IRS coverage (% of at risk population)		28
On track to reduce case incidence by ≥40% by 2020 (vs 2015)		
On track to reduce case mortality by ≥40% by 2020 (vs 2015)		

##### Tracer Indicators for Maternal and Child Health and NTDs

Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2019)		0
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2019)		35
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2019)		32
% deliveries assisted by skilled birth attendant		68
Postnatal care (within 48 hrs)		
Exclusive breastfeeding (% children < 6 months)		7
Vitamin A Coverage 2018 (2 doses)		7
DPT3 coverage 2019 (vaccination among 0-11 month olds)		53

#### Key

	Target achieved or on track
	Progress but more effort required
	Not on track
	No data

## Malaria

### Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic is putting an incredible strain on health systems across Africa. Health systems are required to maintain routine health services for other illnesses even as they handle the additional burden. In order to prevent widespread morbidity and mortality, it is of vital importance that we work to sustain the delivery of essential life-saving interventions during this difficult time including for Reproductive, Maternal, Newborn, Adolescent and Child health, Neglected Tropical Diseases and malaria.

For Equatorial Guinea, the country is encouraged to sustain the delivery of essential health services including malaria case management, during the COVID-19 pandemic. Without this, it is estimated by WHO that there will be an increase in malaria cases and deaths. Under the worst-case scenario, in which there is a 75% reduction in access to effective antimalarial medicines, WHO estimate that there could be a 3.8% increase in malaria cases, and a 30.8% increase in malaria deaths in Equatorial Guinea. This scenario would represent a complete reversal in the substantial progress in malaria mortality reductions seen over the last 2 decades.

It is essential to ensure the continuity of malaria, RMNCAH and NTD services in 2021 as the COVID-19 pandemic continues to impact our continent. This may include the implementation of any necessary catch-up activities and ensuring timely planning to account for potential delays in procurement and delivery. Any intervention must ensure the safety of communities and health workers given the ease of transmission of COVID-19.

### Progress

Equatorial Guinea has made progress with malaria control on Bioko Island and is working to extend this success to the mainland. The country has completed the national insecticide resistance monitoring and management plan and has reported the results of insecticide resistance monitoring to WHO.

### Impact

The annual reported number of malaria cases in 2019 was 83,396 and 15 deaths.

### Key Challenge

- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

### Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address funding	Ensure that sufficient domestic resources are committed to malaria control	Q4 2014		The country is working to mobilise resources to address funding gaps
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2020		The country reports that there are sufficient supplies of ACTs and RDTs to sustain case management during the COVID-19 pandemic, although there were some delays in distributing ACTs. Reductions in the number of patients in Malabo hospital were reported

Equatorial Guinea has responded positively to the previous recommended actions addressing low coverage of iCCM and continues to track progress as this action is implemented.

### New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Address vector control coverage	Address falling vector control coverage	Q4 2021

## RMNCAH and NTDs

### Progress

Progress in addressing Neglected Tropical Diseases (NTDs) in Equatorial Guinea is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis and soil transmitted helminths. Preventive chemotherapy coverage in Equatorial Guinea is low for Soil Transmitted Helminthiasis (33%) and 0% for the rest of the targeted NTDs (Lymphatic filariasis, Onchocerciasis and schistosomiasis). Overall, the NTD preventive chemotherapy coverage index for Equatorial Guinea in 2019 is zero, which represents no change compared with the 2018 index value (0).

### Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH <sup>1</sup> : Optimise quality of care	a) Investigate and address the reasons for the decreasing coverage of postnatal care	Q4 2015		The country does not yet systematically collect postnatal care data
	b) Investigate and address the reasons for the lack of reported data on vitamin A coverage	Q2 2019		The country reported data in 2018 and has increased vitamin A coverage by 2% to 7% but coverage remains low
RMNCAH <sup>1</sup> : Impact	Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2020		The country reports there have been no interruptions in delivery of health services. Equatorial Guinea have adapted this year's workplans to the context of COVID 19, having developed a manual for providing safe care for pregnancy, childbirth and how to keep health workers safe. The country reports it is maintaining services for family planning, ANC, and vaccines, among others
NTDs	Implement preventive chemotherapy for Lymphatic Filariasis and report to WHO the results of Preventive chemotherapy for onchocerciasis, soil transmitted helminths and schistosomiasis	Q1 2020		No progress reported

<sup>1</sup> RMNCAH metrics, recommended actions and response tracked through WHO

Equatorial Guinea has responded positively to the RMNCAH recommended actions addressing lack of data on vitamin A and low coverage of exclusive breastfeeding, ARTs and DPT3. The country continues to track progress as these actions are implemented, and the country has recently increased ART coverage in children.

### New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
NTDs	Implement preventive chemotherapy for Lymphatic Filariasis, onchocerciasis, schistosomiasis and work to increase the Preventive chemotherapy coverage for soil transmitted helminths.	Q4 2021
