

## Scorecard for Accountability and Action

In São Tomé and Príncipe, the annual reported number of malaria cases in 2019 was 2,742 with zero deaths.

### Metrics

#### Commodities Financed and Financial Control

LLIN financing 2021 projection (% of need)	100
Public sector RDT financing 2021 projection (% of need)	100
Public sector ACT financing 2021 projection (% of need)	100
World Bank rating on public sector management and institutions 2019 (CPIA Cluster D)	3.1

#### Insecticide Resistance Monitoring, Implementation and Impact

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	1
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
RDTs in stock (>9 months stock)	
ACTs in stock (>9 months stock)	
LLIN/IRS campaign on track	
Country Reporting Launch of Zero Malaria Starts with Me Campaign	
Scale of Implementation of iCCM	
Operational LLIN/IRS coverage (% of at risk population)	45
On track to reduce case incidence by ≥40% by 2020 (vs 2015)	
On track to reduce case mortality by ≥40% by 2020 (vs 2015)	

#### Tracer Indicators for Maternal and Child Health and NTDs

Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2019)	66
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2019)	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2019)	
% deliveries assisted by skilled birth attendant	93
Postnatal care (within 48 hrs)	87
Exclusive breastfeeding (% children < 6 months)	72
Vitamin A Coverage 2018 (2 doses)	32
DPT3 coverage 2019 (vaccination among 0-11 month olds)	95

### Key

## **Malaria**

### **Sustaining Essential Health Services During the COVID-19 Pandemic**

The COVID-19 pandemic is putting an incredible strain on health systems across Africa. Health systems are required to maintain routine health services for other illnesses even as they handle the additional burden. In order to prevent widespread morbidity and mortality, it is of vital importance that we work to sustain the delivery of essential life-saving interventions during this difficult time including for Reproductive, Maternal, Newborn, Child and Adolescent health, Neglected Tropical Diseases and malaria.

For São Tomé and Príncipe, it was of vital importance that the indoor residual spraying (IRS) campaign went ahead, whilst taking into account physical distancing, in accordance with the guidance and recommendations from WHO. The country is commended on rolling out the IRS campaign as planned. Without this IRS, coupled with the need to sustain essential health services including malaria case management, there will be an increase in malaria cases and deaths.

It is essential to ensure the continuity of malaria, RMNCAH and NTD services in 2021 as the COVID-19 pandemic continues to impact our continent. This may include the implementation of any necessary catch-up activities and ensuring timely planning to account for potential delays in procurement and delivery. Any intervention must ensure the safety of communities and health workers given the ease of transmission of COVID-19.

### **Progress**

São Tomé and Príncipe secured sufficient resources to finance the ACTs, and LLINs/IRS required for 2021. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO, and has recently completed the insecticide resistance monitoring and management plan. The country has decreased the estimated malaria mortality rate by more than 40% since 2010.

In line with the legacy agenda of the ALMA chair, His Excellency President Uhuru Kenyatta, São Tomé and Príncipe has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Elimination Scorecard, although the scorecard has not yet been posted to the ALMA Scorecard Knowledge Hub.

### **Impact**

The annual reported number of malaria cases in 2019 was 2,742 with zero deaths.

### **Key Challenges**

- Malaria upsurges observed.
- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

## Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2020		STP reports there have been some reductions in malaria interventions including active case detection due to the COVID-19 pandemic. The country has also faced RDT stock outs but a stock delivery but now has sufficient stocks of both ACTs and RDTs. The IRS was carried out as planned in Q4 2020. Targeted IRS was also carried out in some zones to address increases in cases

The country has responded positively to the recommended action addressing iCCM scale-up.

## RMNCAH and NTDs

### Progress

São Tomé and Príncipe has achieved high coverage in the tracer RMNCAH interventions DPT3 vaccination coverage, skilled birth attendants and exclusive breastfeeding and postnatal care.

Progress in addressing Neglected Tropical Diseases (NTDs) in Sao Tomé and Príncipe is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, schistosomiasis, and soil transmitted helminths. Preventive chemotherapy coverage is good for lymphatic filariasis (72%), soil transmitted helminths (65%) and schistosomiasis (61%). Overall, the NTD preventive chemotherapy coverage index for Sao Tomé and Príncipe in 2019 is 66, which represents a substantial decrease compared with the 2018 index value (89).

## Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH <sup>1</sup> : Impact	Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2020		The country reports there have been interruptions to routine immunization and there are verified stockouts of BCG and yellow fever vaccines. The surveillance of vaccine-preventable diseases has also had disruptions, as surveillance focal points are dedicating much of their time to COVID-19. The country has adopted a framework to guide the emergency response to the COVID-19 pandemic.
NTDs	Ensure that NTD interventions including Mass Drug Administration, vector control and Morbidity Management and Disability Prevention are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. This includes prioritising key necessary catch up activities	Q4 2021		Deliverable not yet due

São Tomé and Príncipe has responded positively to the RMNCAH recommended actions addressing the lack of data for ARTs, and continues to track progress as these actions are implemented.
