

Scorecard for Accountability and Action

Metrics

Commodities Financed	
LLIN financing 2022 projection (% of need)	100
Public sector RDT financing 2022 projection (% of need)	100
Public sector ACT financing 2022 projection (% of need)	100
Policy	
Signed, ratified and deposited the AMA instrument at the AUC	
Malaria activities targeting refugees in Malaria Strategic Plan	
Malaria activities targeting IDPs in Malaria Strategic Plan	
Country Reporting Launch of Zero Malaria Starts with Me Campaign	
Resistance Monitoring, Implementation and Impact	
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
RDTs in stock (>6 months stock)	
ACTs in stock (>6 months stock)	
LLIN/IRS campaign on track	
Operational LLIN/IRS coverage (% of at risk population)	100
On track to reduce case incidence by ≥40% by 2020 (vs 2015)	
On track to reduce case mortality by ≥40% by 2020 (vs 2015)	
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19	
Scale of Implementation of iCCM	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2020)	12
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2021)	35
Vitamin A Coverage 2020 (2 doses)	0
DPT3 coverage 2021 (vaccination among 0-11 month olds)	58
% Population Fully Vaccinated Against COVID-19	12

Malaria transmission in Chad is intense in the south of the country. The annual reported number of malaria cases in 2020 was 1,890,264 with 2,955 deaths.

Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic has disrupted routine health services considerably, and the economic impacts continue to hamper health systems recovery. It is vitally important that we focus on recovering lost ground in delivering essential life-saving interventions during this difficult time, sustaining progress towards the SDG targets for Malaria, Neglected Tropical Diseases and Reproductive, Maternal, New-born, Child and Adolescent health.

Given the difficulties in securing essential health commodities in Africa during the COVID-19 pandemic, it is of vital importance that countries sign, ratify and deposit the African Medicines Agency (AMA) instrument with the AUC in order to improve access to quality, safe and efficacious medical products in Africa. The country is congratulated for doing this. Early procurement of essential health commodities is also highly recommended whilst long delivery times persist.

The country has been affected by the continent-wide restriction of access to COVID-19 vaccines and had only been able to cover 12% of their population by July 2022. The country, working with partners, should invest in education and behaviour change communication to increase the uptake of COVID vaccines and therapeutics.

Malaria

Progress

The ACTs, RDTs and LLINs needed for 2022 are fully financed. Chad has procured sufficient LLINs to achieve operational universal coverage of the targeted at-risk population. Chad has also successfully rolled out the LLIN campaign, distributing nets door to door to ensure social distancing during the COVID-19 pandemic. The country has improved stocks of ACTs and RDTs. Chad has carried out drug resistance testing since 2018 and has reported the results to WHO. The national strategic plan includes activities targeting refugees.

In line with the legacy agenda of the ALMA chair, His Excellency President Uhuru Kenyatta, Chad has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, however this scorecard is not yet shared through the ALMA Scorecard Hub.

Impact

The annual reported number of malaria cases in 2020 was 1,890,264 with 2,955 deaths.

Key Challenges

- Weak health information system.
- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2022		The country is providing malaria health care services as planned through health facilities and at community level. ACTs and RDTs are available at country and health facilities levels. Pregnant women are continuing to benefit from intermittent Preventive treatment (IPT) with SP. The country faced delay in ITN delivery (planned for April and then July 2022) for the routine distribution and some health facilities faced a stock out
Policy	Work to incorporate activities targeting IDPs in the Malaria Strategic Plan	Q4 2023		Deliverable not yet due

Chad has responded positively to the recommended actions for the reporting of insecticide resistance to WHO.

RMNCAH and NTDs

Progress

Progress in addressing Neglected Tropical Diseases (NTDs) in Chad is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. In 2020, preventive chemotherapy coverage in Chad was very good for lymphatic filariasis (78%) and for onchocerciasis (68%) but was low for schistosomiasis (15%) and for soil-transmitted helminths (26%) and very low for trachoma (0%). Overall, the NTD preventive chemotherapy coverage index for Chad in 2020 is 12 with a very substantial decrease compared with the index value of 2019 (65).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Impact	Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2022		In Chad, reductions in service utilization related to COVID-19 were observed at the beginning of the pandemic. Currently, service users are accessing RMNCAH services as normal. The country is fundraising for more resources to equip health facilities with resuscitation facilities, drugs and other essential health materials. The failure to reach optimum immunization coverage of the vulnerable in the country has put the health system under renewed strain. There have been 7,424 COVID-19 cases and 193 deaths reported in Chad as of May 2022. UNICEF and WHO continue supporting the mass COVID-19 vaccination campaign which has divided the country into two blocks. The first block targeted ten provinces and took place from 24 March to 2 April 2022, reaching 1.9 million with the first dose, whilst 162,091 are fully vaccinated, including 1,643 health care providers. The second block targeting 13 provinces will take place on 29 June to 8 July 2022. Partners are working with the government to strengthen country capacity on case management in oxygen installation in provincial hospitals in strategic sites and in ensuring that interventions comply with the guidelines established by the health authorities in the field against COVID-19
NTDs	Recognising the negative impact of COVID-19 on the 2020 MDA coverage, ensure that NTD interventions including MDAs, vector control and Morbidity Management and Disability Prevention are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. This includes prioritizing key necessary catch up	Q4 2022		No Progress Reported

¹ RMNCAH metrics, recommended actions and response tracked through WHO

	activities including working to increase the coverage of all the preventive chemotherapy NTDs			
Optimise quality of care	Address the falling coverage of vitamin A	Q4 2022		Deliverable not yet due

Chad has responded positively to the recommended actions for ART coverage in children and continues to track progress as actions are implemented.
