

Scorecard for Accountability and Action

Malaria transmission in Chad is intense in the south of the country. The annual reported number of malaria cases in 2020 was 1,890,264 with 2,955 deaths.

Metrics

Commodities Financed		
LLIN financing 2022 projection (% of need)	100	
Public sector RDT financing 2022 projection (% of need)	100	
Public sector ACT financing 2022 projection (% of need)	100	
Policy		
Signed, ratified and deposited the AMA instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Country Reporting Launch of Zero Malaria Starts with Me Campaign		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3	
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)	100	
On track to reduce case incidence by ≥40% by 2020 (vs 2015)		
On track to reduce case mortality by ≥40% by 2020 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of ICCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2020)	12	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2021)	35	
Vitamin A Coverage 2020 (2 doses)	0	
DPT3 coverage 2021 (vaccination among 0-11 month olds)	58	
% Population Fully Vaccinated Against COVID-19	▲	22

Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic has disrupted routine health services considerably, and the economic impacts continue to hamper health systems recovery. It is vitally important that we focus on recovering lost ground in delivering essential life-saving interventions during this difficult time, sustaining progress towards the SDG targets for Malaria, Neglected Tropical Diseases and Reproductive, Maternal, New-born, Child and Adolescent health.

Given the difficulties in securing essential health commodities in Africa during the COVID-19 pandemic, it is of vital importance that countries sign, ratify and deposit the African Medicines Agency (AMA) instrument with the AUC in order to improve access to quality, safe and efficacious medical products in Africa. The country is congratulated for doing this. Early procurement of essential health commodities is also highly recommended whilst long delivery times persist.

The country has been affected by the continent-wide restriction of access to COVID-19 vaccines and had only been able to cover 22% of their population by October 2022. The country, working with partners, should invest in education and behaviour change communication to increase the uptake of COVID vaccines and therapeutics.

Malaria

Progress

The ACTs, RDTs and LLINs needed for 2022 are fully financed. Chad has procured sufficient LLINs to achieve operational universal coverage of the targeted at-risk population. Chad has also successfully rolled out the LLIN campaign, distributing nets door to door to ensure social distancing during the COVID-19 pandemic. The country has improved stocks of ACTs and RDTs. Chad has carried out drug resistance testing since 2018 and has reported the results to WHO. The national strategic plan includes activities targeting refugees.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Chad has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, however this scorecard is not yet shared through the ALMA Scorecard Hub.

Impact

The annual reported number of malaria cases in 2020 was 1,890,264 with 2,955 deaths.

Key Challenges

- Weak health information system.
- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2022		The SMC campaign was completed as planned. Key malaria interventions such as the diagnosis and treatment of cases were implemented at health facility level. ITNs for routine distribution were delivered and there were no stock-outs at health facility level. The NMCP is planning to implement the MPR and NSP development. Planning for the 2023 ITN campaign is on track
Policy	Work to incorporate activities targeting IDPs in the Malaria Strategic Plan	Q4 2023		Deliverable not yet due

Chad has responded positively to the recommended actions for the reporting of insecticide resistance to WHO.

RMNCAH and NTDs

Progress

Progress in addressing Neglected Tropical Diseases (NTDs) in Chad is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. In 2020, preventive chemotherapy coverage in Chad was very good for lymphatic filariasis (78%) and for onchocerciasis (68%) but was low for schistosomiasis (15%) and for soil-transmitted helminths (26%) and very low for trachoma (0%). Overall, the NTD preventive chemotherapy coverage index for Chad in 2020 is 12 with a very substantial decrease compared with the index value of 2019 (65).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Impact	Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2022		The COVID-19 vaccination campaign continues to roll out with 22% coverage achieved to date. The essential RMNCAH services in the country have returned to normal, with an increase in service utilization, also reinforced by intensified demand creation. Efforts are also underway to reinforce the EPI coverage and ensure essential drugs are available
NTDs	Recognising the negative impact of COVID-19 on the 2020 MDA coverage, ensure that NTD interventions including MDAs, vector control and Morbidity Management and Disability Prevention are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. This includes prioritizing key necessary catch up activities including working to increase the coverage of all the preventive chemotherapy NTDs	Q4 2022		No Progress Reported
Optimise quality of care	Address the falling coverage of vitamin A	Q4 2022		Deliverable not yet due

Chad has responded positively to the recommended actions for ART coverage in children and continues to track progress as actions are implemented.
