

Scorecard for Accountability and Action

Metrics

Commodities Financed		
LLIN financing 2022 projection (% of need)	100	
Public sector RDT financing 2022 projection (% of need)	100	
Public sector ACT financing 2022 projection (% of need)	100	
Policy		
Signed, ratified and deposited the AMA instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Country Reporting Launch of Zero Malaria Starts with Me Campaign		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4	
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)	100	
On track to reduce case incidence by ≥40% by 2020 (vs 2015)		
On track to reduce case mortality by ≥40% by 2020 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of iCCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2020)	59	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2021)	54	
Vitamin A Coverage 2020 (2 doses)	89	
DPT3 coverage 2021 (vaccination among 0-11 month olds)	76	
% Population Fully Vaccinated Against COVID-19	▲	27

Malaria transmission occurs all year round throughout Côte d'Ivoire, although it is more seasonal in the north of the country. The annual reported number of malaria cases in 2020 was 4,980,640 with 1,316 deaths.

Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic has disrupted routine health services considerably, and the economic impacts continue to hamper health systems recovery. It is vitally important that we focus on recovering lost ground in delivering essential life-saving interventions during this difficult time, sustaining progress towards the SDG targets for Malaria, Neglected Tropical Diseases and Reproductive, Maternal, New-born, Child and Adolescent health.

Given the difficulties in securing essential health commodities in Africa during the COVID-19 pandemic, it is of vital importance that countries sign, ratify and deposit the African Medicines Agency (AMA) instrument with the AUC in order to improve access to quality, safe and efficacious medical products in Africa. The country is encouraged to complete this process. Early procurement of essential health commodities is also highly recommended whilst long delivery times persist.

The country has been affected by the continent-wide restriction of access to COVID-19 vaccines and had only been able to cover 27% of their population by October 2022. The country, working with partners, should invest in education and behaviour change communication to increase the uptake of COVID vaccines and therapeutics.

Malaria

Progress

Côte d'Ivoire has successfully raised resources for the financing of LLINs, RDTs, and ACTs in 2022 and has procured enough LLINs to achieve 100% operational coverage of the targeted at-risk population with LLINs. The country has also scaled up implementation of iCCM. There are sufficient stocks of ACTs and RDTs. Côte d'Ivoire has recently reported the results of insecticide resistance testing to WHO and has carried out drug resistance testing since 2018 and has reported the results to WHO. The national strategic plan includes activities targeting refugees. The country has launched the Zero Malaria Starts with Me campaign.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Côte d'Ivoire has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, however the scorecard is not yet shared through the ALMA Scorecard Hub.

Impact

The annual reported number of malaria cases in 2020 was 4,980,640 with 1,316 deaths.

Key Challenge

- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and NTDs.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2022		The country reports good stocks of ACTs and RDTs. The Indoor Residual Spraying campaign was completed in June 2022

RMNCAH and NTDs

Progress

The country has made progress on the tracer RMNCAH intervention of vitamin A and of ARTs. Côte d'Ivoire has enhanced tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Côte d'Ivoire is measured using a composite index calculated from preventive chemotherapy coverage achieved for onchocerciasis, schistosomiasis, soil transmitted helminths, lymphatic filariasis and trachoma. In 2020, preventive chemotherapy coverage in Côte d'Ivoire was very good for schistosomiasis (100%), onchocerciasis (74%) and for soil transmitted helminths (82%). Coverage for lymphatic filariasis (48%) and trachoma (25%) was low. Overall, the NTD preventive chemotherapy coverage index for Côte d'Ivoire in 2020 is 59 and this represents substantial decrease compared with the 2019 index value (65).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Optimise quality of care	Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2020		The country reports that health services use and demand decreased significantly in 2020 but that the demand for and use of health services has since recovered. NGOs and CBOs carried out outreach and mass-communication awareness-raising activities on COVID-19 including designing and distributing communication materials, radio ads, illustrated fact sheets, illustrated guides, posters, posts on social media and digital platforms. PPE has been distributed to community health workers with additional PPE funded through the Global Fund
NTDs	Ensure that NTD interventions including Mass Drug Administration, vector control and Morbidity Management and Disability Prevention are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. This includes prioritising key necessary catch-up activities	Q4 2022		The country is conducting NTD prevention and control activities whilst respecting COVID-19 preventive measures. The country has been working on NTD surveillance activities including the transmission assessment surveys. The country has also carried out Morbidity Management and Disability Prevention activities. No MDA medicine expiration was reported by the country
