

Scorecard for Accountability and Action

The entire population of Ghana is at risk of malaria. The annual reported number of malaria cases in 2020 was 5,879,506 with 308 deaths.

Metrics

Commodities Financed		
LLIN financing 2022 projection (% of need)		100
Public sector RDT financing 2022 projection (% of need)		100
Public sector ACT financing 2022 projection (% of need)		100
Policy		
Signed, ratified and deposited the AMA Instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Country Reporting Launch of Zero Malaria Starts with Me Campaign		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		4
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)		100
On track to reduce case incidence by ≥40% by 2020 (vs 2015)		
On track to reduce case mortality by ≥40% by 2020 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of iCCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2020)		0
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2021)		43
Vitamin A Coverage 2020 (2 doses)		31
DPT3 coverage 2021 (vaccination among 0-11 month olds)		98
% Population Fully Vaccinated Against COVID-19		26

Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic has disrupted routine health services considerably, and the economic impacts continue to hamper health systems recovery. It is vitally important that we focus on recovering lost ground in delivering essential life-saving interventions during this difficult time, sustaining progress towards the SDG targets for Malaria, Neglected Tropical Diseases and Reproductive, Maternal, New-born, Child and Adolescent health.

Given the difficulties in securing essential health commodities in Africa during the COVID-19 pandemic, it is of vital importance that countries sign, ratify and deposit the African Medicines Agency (AMA) instrument with the AUC in order to improve access to quality, safe and efficacious medical products in Africa. The country is congratulated for doing this. Early procurement of essential health commodities is also highly recommended whilst long delivery times persist.

The country has been affected by the continent-wide restriction of access to COVID -19 vaccines and had only been able to cover 26% of their population by October 2022. The country, working with partners, should invest in education and behaviour change communication to increase the uptake of COVID vaccines and therapeutics.

Malaria

Progress

Ghana has secured sufficient resources for the essential anti-malarial commodities required to sustain coverage in 2022 and has distributed sufficient numbers of LLINs and carried out IRS sufficient to achieve 100% operational coverage of the targeted at-risk population. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO and has carried out drug resistance testing since 2018 and has reported the results to WHO. Ghana has scaled up coverage of iCCM. The country is also showing leadership in malaria control through its participation in the High Burden High Impact approach. Ghana has also launched its Zero Malaria Starts with Me campaign. Ghana has decreased the estimated malaria incidence and mortality rates by more than 40% since 2015.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Ghana has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Elimination Scorecard and has posted the scorecard to the ALMA Scorecard Hub.

Impact

The annual reported number of malaria cases in 2020 was 5,879,506 with 308 deaths.

Key Challenges

- Insecticide resistance threatens vector control effectiveness.
- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic	Q4 2022		The country has good stocks of ACTs and a strong delivery pipeline. The IRS and SMC campaigns were completed as planned. The malaria programme has expanded Outreach, Training and Supportive Supervision (OTSS) at sub-regional level to enhance quality improvement in malaria case management whilst ensuring that facility staff implement malaria control activities according to policy recommendations. The COVID-19 pandemic has increased the costs of campaigns, creating some gaps in funding for the operational costs

RMNCAH and NTDs

Progress

The country has achieved high coverage of tracer RMNCAH DPT3. The country has significantly enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn and Child Health Scorecard, including with the introduction of community level scorecards. The country has also published the RMNCAH and community scorecards on the ALMA Scorecard Hub.

Progress in addressing Neglected Tropical Diseases (NTDs) in Ghana is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. In 2020, preventive chemotherapy coverage was 100% for trachoma and 0% for schistosomiasis, onchocerciasis, lymphatic filariasis and soil-transmitted helminths. Overall, the NTD preventive chemotherapy coverage index for Ghana in 2020 is 0, which represents a very substantial decrease compared with the 2019 index value (73).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH ¹ : Impact	Ensure that essential RMNCAH services are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. Address any stock-outs of essential RMNCAH commodities	Q4 2022		Ghana reports there have been improvements in RMNCAH services for ANC, PNC and EPI since the COVID-19 pandemic disruptions. The country continues to offer essential services. Child health services continue to perform well: Penta 3 coverage is at 96% and Measles/ Rubella vaccination rates at 75% in Q3 2022, though Meningitis coverage has decreased from 79% in Q1 2021 to 68% in Q3 2022. In terms of Maternal Health Services, ANC 4 remains steady at 82% and PNC is high at 97% in Q3 2022. Ghana have offered continuous training and rolled out COVID-19 vaccination. To mitigate for the impact on RMNCAH services, Ghana has adopted COVID-19 protocols and guidelines for paediatric and obstetric care. The guidelines establish special arrangements for COVID-19 prevention and service delivery with key messages for service providers and communities. The guidelines enhance trust in the capacity of the health system and ensure appropriate care-seeking behaviour. The COVID-19 pandemic has affected the regular in-flow of essential commodities to render effective RMNCAH services at the service delivery point
NTDs	Recognising the negative impact of COVID-19 on the 2020 MDA coverage, ensure that NTD interventions including MDAs, vector control and Morbidity Management and Disability Prevention are sustained and implemented whilst using Covid-19 sensitive guidelines during the pandemic. This includes prioritizing key necessary catch up activities	Q4 2022		Deliverable not yet due

Ghana has responded positively to the RMNCAH recommended action addressing the low coverage of ARTs in children, with recent increases reported, and continues to track progress as these actions are implemented.
