Malaria transmission in Nigeria takes place all year round in the south but is more seasonal in the northern regions. The annual reported number of malaria cases in 2020 was 21,580,055 cases and 1811 deaths.

### Scorecard for Accountability and Action

#### Metrics

<table>
<thead>

</table>

#### Policy

- Signed, ratified and deposited the AMA instrument at the AUC: Not on track
- Malaria activities targeting refugees in Malaria Strategic Plan: No data
- Malaria activities targeting IDPs in Malaria Strategic Plan: Not applicable
- Country Reporting Launch of Zero Malaria Starts with Me Campaign: No data

#### Resistance Monitoring, implementation and impact

- Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO: Target achieved or on track
- Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010: Not on track
- Insecticide resistance monitored since 2015 and data reported to WHO: Target achieved or on track
- National Insecticide Resistance Monitoring and Management Plan: Not applicable
- RDTs in stock (>6 months stock): Target achieved or on track
- ACTs in stock (>6 months stock): Target achieved or on track
- LLIN/IRS campaign on track: Not applicable
- Operational LLIN/IRS coverage (% of at risk population): Target achieved or on track
- On track to reduce case incidence by 240% by 2020 (vs 2015): Not on track
- On track to reduce case mortality by 240% by 2020 (vs 2015): Not applicable

### Tracer Indicators for Maternal and Child Health, NTDs and Covid 19

- Scale of implementation of ICCM: Target achieved or on track
- Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %) (2020): Target achieved or on track
- Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2021): Target achieved or on track
- Vitamin A Coverage 2020 (2 doses): Progress but more effort required
- DPT3 coverage 2021 (vaccination among 9–11 month olds): Target achieved or on track
- % Population Fully Vaccinated Against COVID-19: Target achieved or on track

#### Key

- **Green**: Target achieved or on track
- **Yellow**: Progress but more effort required
- **Red**: Not on track
- **Gray**: No data
- **Blue**: Not applicable
Sustaining Essential Health Services During the COVID-19 Pandemic

The COVID-19 pandemic has disrupted routine health services considerably, and the economic impacts continue to hamper health systems recovery. It is vitally important that we focus on recovering lost ground in delivering essential life-saving interventions during this difficult time, sustaining progress towards the SDG targets for Malaria, Neglected Tropical Diseases and Reproductive, Maternal, Newborn, Child and Adolescent health.

Given the difficulties in securing essential health commodities in Africa during the COVID-19 pandemic, it is of vital importance that countries sign, ratify and deposit the African Medicines Agency (AMA) instrument with the AUC in order to improve access to quality, safe and efficacious medical products in Africa. The country is encouraged to do this. Early procurement of essential health commodities is also highly recommended whilst long delivery times persist.

The country has been affected by the continent-wide restriction of access to COVID-19 vaccines and had only been able to cover 13% of their population by October 2022. The country, working with partners, should invest in education and behaviour change communication to increase the uptake of COVID vaccines and therapeutics.

Malaria Progress

Nigeria has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO and has finalised the development of the national insecticide resistance monitoring and management plan and has carried out drug resistance testing since 2018 and has reported the results to WHO. The national strategic plan includes activities targeting refugees and IDPs. Nigeria has decreased the estimated malaria mortality rate by more than 40% since 2010. The country is also showing leadership in malaria control through its participation in the High Burden High Impact approach. Nigeria has launched its Zero Malaria Starts with Me campaign. The approval of the World Bank US$200 million loan for malaria control in thirteen states is a significant development.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Nigeria has enhanced the tracking and accountability mechanisms for malaria with the development of the Malaria Control and Elimination Scorecard, although the scorecard has not yet been posted to the ALMA Scorecard Hub. The country has recently launched the Nigeria End Malaria Council and Fund.

Impact

The annual reported number of malaria cases in 2020 was 21,580,055 cases and 1811 deaths.

Key Challenge

- Sustaining the delivery of essential life-saving interventions during the COVID-19 pandemic including for Reproductive, Maternal, Newborn, Adolescent and Child health, malaria and Neglected Tropical Diseases.

<td>Impact</td>
<td>Ensure that malaria services including case management and vector control are sustained and implemented whilst using COVID-19 sensitive guidelines during the pandemic</td>
<td>Q4 2022</td>
<td>Green</td>
<td>In Q3 2022, the programme implemented several key activities across the interventions towards a reduction in the malaria burden. This included enhanced malaria communications and advocacy. Including the finalization of the new national strategy and Implementation Plan. The country completed the SMC Drug Administration in 21 States and carried out 6 ITN distribution campaigns in Delta, Kaduna, Anambra, Niger, Taraba and Yobe States. All campaigns were monitored by NMEP. The Annual Malaria Programme Review Meeting with States Malaria Programme Managers and M&amp;E officers in attendance. In terms of commodities available for the programme the table below, ACTS are below the minimum months of stock.</td>

Nigeria has responded positively to the previous recommended actions addressing insufficient resources to fully implement the essential malaria control interventions and continues to track progress as these actions are implemented.

**RMNCAH and NTDs**

**Progress**

The country has significantly enhanced tracking and accounting mechanisms with the development of the RMNCAH scorecard tool.

Progress in addressing Neglected Tropical Diseases (NTDs) in Nigeria is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. In 2020, preventive chemotherapy coverage was 75% for onchocerciasis, 55% for both lymphatic filariasis and schistosomiasis, 53% for trachoma and 44% for soil-transmitted helminths. Overall, the NTD preventive chemotherapy coverage index for Nigeria in 2020 is 56, which represents a decrease compared with the 2019 index value (76).
