

Scorecard for Accountability and Action

The entire population of the Republic of the Congo is at high risk of malaria and transmission is intense all year round. The annual reported number of malaria cases in 2015 was 264,574 with 435 deaths.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2017 projection (% of need)	0
Public sector RDT financing 2017 projection (% of need)	40
Public sector ACT financing 2017 projection (% of need)	31
World Bank rating on public sector management and institutions 2016 (CPIA Cluster D)	2.5
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	2
Insecticide resistance monitored since 2014 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2016)	
Operational LLIN/IRS coverage (% of at risk population)	0
Estimated change in malaria incidence rate (2010–2015)	
Estimated change in malaria mortality rate (2010–2015)	
Tracer Indicators for Maternal and Child Health	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2016)	23
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2016)	24
% deliveries assisted by skilled birth attendant	94
Postnatal care (within 48 hrs)	80
Exclusive breastfeeding (% children < 6 months)	33
Vitamin A Coverage 2014 (2 doses)	99
DPT3 coverage 2016 (vaccination among 0-11 month olds)	73

Malaria

The Global Fund

The Global Fund announced that Congo will receive € 27.9 million for HIV, tuberculosis, malaria, and health systems strengthening as the country allocation for 2018-2020. The malaria component is allocated a specific proportion of the total, according to a formula developed by the Global Fund that takes into account several factors, including disease burden and previous disbursements. For Congo this is calculated at € 12.7 million. The allocations to the individual disease components are not fixed, and can be adjusted according to decisions made at country level. Congo is urged to ensure that resources are allocated to malaria control from the overall Global Fund country allocation, as well as from domestic resources.

Progress

Congo has carried out insecticide resistance monitoring since 2014 and has reported the results to WHO.

Impact

The annual reported number of malaria cases in 2015 was 264,574 with 435 deaths. WHO estimates that the country has achieved a decrease of 20-40% for malaria incidence rate and a change of less than 20% for malaria mortality rate for the period 2010 - 2015.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address vector control coverage	Address falling LLIN coverage	Q2 2014		The country plans to use the allocation of GF resources for the 2018-2020 period to address the funding gaps for the 3 million LLINs required to ensure universal coverage
Vector Control	Given the reported mosquito resistance to 2 classes of insecticide, urgently finalise the national insecticide resistance monitoring and management plan	Q1 2017		Congo has recently tested for mosquito insecticide resistance and preliminary results are available. The country has begun the development of a national insecticide resistance monitoring and management plan. WHO will support the finalisation of the document by Q3 of 2017
Address funding	Ensure the GF malaria funding application is submitted by Q2 2017 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years	Q2 2017		The country submitted the GF funding application in May 2017
Enact high level policy and strategy change	Improve rule-based governance, quality of budgetary and financial management, efficiency of revenue mobilisation, quality of public administration, and transparency and accountability in the public sector	Q3 2013		No progress reported

Congo has responded to the recommended actions addressing financing of anti-malarial commodities and continues to track progress as these actions are implemented.

MNCH

Progress

Congo has made good progress in tracer MNCH interventions including skilled birth attendants, DPT3 and postnatal care. The country has significantly enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Previous Key Recommended Action

Congo has responded positively to the MNCH recommended action addressing low coverage of ARTs and continues to track progress as these actions are implemented.
