

Scorecard for Accountability and Action

Malaria transmission occurs all year round throughout Côte d'Ivoire, although it is more seasonal in the north of the country. The annual reported number of malaria cases in 2016 was 3,471,024 with 3,340 deaths.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2017 projection (% of need)	100
Public sector RDT financing 2017 projection (% of need)	100
Public sector ACT financing 2017 projection (% of need)	95
World Bank rating on public sector management and institutions 2016 (CPIA Cluster D)	3.2
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2016)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in malaria incidence rate (2010–2016)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2016)	68
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2016)	41
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2016)	26
% deliveries assisted by skilled birth attendant	59
Postnatal care (within 48 hrs)	70
Exclusive breastfeeding (% children < 6 months)	12
Vitamin A Coverage 2015 (2 doses)	72
DPT3 coverage 2016 (vaccination among 0-11 month olds)	96

Malaria

Progress

Côte d'Ivoire has successfully raised resources for the financing of the required number of LLINs, RDTs, and ACTs in 2017 and has procured enough LLINs to achieve universal coverage of LLINs in 2017. The country has also scaled up implementation of iCCM and achieved operational universal coverage of LLINs. Côte d'Ivoire has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard.

Impact

The annual reported number of malaria cases in 2016 was 3,471,024 with 3,340 deaths.

Key Challenge

- Securing longer term resources for malaria programming.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Address Funding	Work to accelerate the signature of the GF grant	Q4 2017		The country completed the grant making requirements for grant approval

Côte d'Ivoire has responded positively to the recommended action on the monitoring of national insecticide resistance.

MNCH and NTDs

Progress

The country has made progress on the tracer MNCH interventions of DPT3. Côte d'Ivoire has significantly enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Côte d'Ivoire is measured using a composite index calculated from preventive chemotherapy coverage achieved for onchocerciasis, schistosomiasis, soil transmitted helminths, and trachoma. Preventive chemotherapy coverage in Côte d'Ivoire is high for onchocerciasis (95%), schistosomiasis (84%) and soil transmitted helminths (85%). Coverage for trachoma is 32%. Overall, the NTD preventive chemotherapy coverage index for Côte d'Ivoire in 2016 is 68 and this represents a substantial increase compared with the 2015 index value (11).

Previous Key Recommended Actions

Côte d'Ivoire has responded positively to the MNCH recommended action addressing low coverage of exclusive breastfeeding and accelerating coverage of ARTs in children and continues to track progress as this action is implemented.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Optimise quality of care	Address the decreasing vitamin A coverage	Q4 2018
