Ethiopia ALMA Quarterly Report Quarter Four, 2018

Scorecard for Accountability and Action

Commodities Financed and Financial Control		
LLIN financing 2018 projection (% of need)		10
Public sector RDT financing 2018 projection (% of need)		10
Public sector ACT financing 2018 projection (% of need)		10
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)		3
Insecticide Resistance Monitoring, Implementation a	nd	Impact
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		
Insecticide resistance monitored since 2015 and data reported to WHO		9:
National Insecticide Resistance Monitoring and Management Plan		
Scale of Implementation of iCCM (2017)		
Operational LLIN/IRS coverage (% of at risk population)	•	•
Change in Estimated Malaria Incidence(2010–2017)		
Change in Estimated Malaria Mortality rate(2010–2017)		
Tracer Indicators for Maternal and Child Health and I	NTE)s
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	A	-
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)		1
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)		3
% deliveries assisted by skilled birth attendant		3
Postnatal care (within 48 hrs)		
Exclusive breastfeeding (% children < 6 months)		
Vitamin A Coverage 2016 (2 doses)		7
DPT3 coverage 2017 (vaccination among 0-11		7
month olds)		

Malaria is endemic in Ethiopia with differing intensity of transmission, except in the central highlands which are malaria-free. The annual reported number of malaria cases in 2017 was 1,755,748 with 356 deaths.

Key

Ethiopia ALMA Quarterly Report Quarter Four, 2018

Malaria

Progress

Ethiopia has scaled up iCCM and secured sufficient resources to sustain coverage of LLINs, IRS, ACTs and RDTs in 2018. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO and has recently completed the national insecticide resistance monitoring and management plan. Ethiopia has put in place strong public sector management systems and has achieved a rating of 3.5 for Cluster D CPIA. Ethiopia has decreased the estimated malaria incidence and mortality rates by more than 40% since 2010.

Impact

The annual reported number of malaria cases in 2017 was 1,755,748 with 356 deaths.

Key Challenge

Ethiopia has documented insecticide resistance to 4 insecticide classes.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Vector Control	Address the decreasing LLIN coverage	Q3 2019		4.6 million LLINs were delivered to the country in the last quarter

MNCH and NTDs

Progress

Ethiopia has achieved good coverage of the tracer MNCH intervention exclusive breastfeeding. Ethiopia has significantly enhanced the tracking and accountability mechanisms with the development of the Maternal, Newborn, Child and Adolescent Health Scorecard, including with the introduction of community level scorecards.

Progress in addressing Neglected Tropical Diseases (NTDs) in Ethiopia is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Ethiopia is high for onchocerciasis (81%), good for lymphatic filariasis (75%), schistosomiasis (71%), trachoma (71%) and soil transmitted helminths (70%). Overall, the NTD preventive chemotherapy coverage index for Ethiopia in 2017 is 73, which represents substantial increase compared with the 2016 index value (51).

Previous Key Recommended Actions

Ethiopia has responded positively to the MNCH recommended actions addressing low coverage of postnatal care, ARTs in children under 14 years of age and skilled birth attendants and there have been recent increases in coverage resulting from these actions taken.
