Ghana ALMA Quarterly Report Quarter Four, 2016

Scorecard for Accountability and Action

| euics | |
|---|-----|
| Commodities Financed and Financial Control | |
| LLIN financing 2016 projection (% of need) | 100 |
| Public sector RDT financing 2016 projection (% of need) | 100 |
| Public sector ACT financing 2016 projection (% of need) | 100 |

Insecticide Resistance Monitoring, Implementation and Impact

3.7

World Bank rating on public sector management

Tracer Indicators for Maternal and Child Health

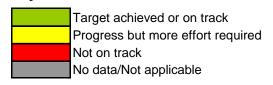

and institutions 2015 (CPIA Cluster D)

| Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010 | 4 |
|--|-----|
| Insecticide resistance monitored since 2014 and data reported to WHO | 4. |
| National Insecticide Resistance Monitoring and Management Plan | |
| Scale of Implementation of ICCM (2016) | |
| Operational LLIN/IRS coverage (% of at risk population) | 100 |
| Estimated change in malaria incidence rate (2010–2015) | |
| Estimated change in malaria mortality rate | |

| Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2015) | 34 |
|---|----|
| Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2015) | 27 |
| % deliveries assisted by skilled birth attendant | 74 |
| Postnatal care (within 48 hrs) | 81 |
| Exclusive breastfeeding (% children < 6 months) | 52 |
| Vitamin A Coverage 2014 (2 doses) | 23 |
| DPT3 coverage 2015 (vaccination among 0-11 month olds) | 88 |

The entire population of Ghana is at risk of malaria. The annual reported number of malaria cases in 2015 was 10,186,510 with 2,137 deaths.

Key

Ghana ALMA Quarterly Report Quarter Four, 2016

Malaria

Global Fund Update

The Global Fund has announced that Ghana will receive US\$ 194 million for HIV, tuberculosis, malaria, and health systems strengthening as the country allocation for 2018-2020. The Global Fund has determined the total allocation amount based on Ghana's disease burden and income level, as well as several other factors. The malaria component is also allocated a specific proportion of the total, according to a formula developed by the Global Fund that takes into account several factors, including disease burden and previous disbursements. For Ghana this is calculated at US\$ 111.5 million. The allocations to the individual disease components are not fixed, and can be adjusted according to decisions made at country level. Ghana is urged to ensure that resources are allocated to malaria control from the overall Global Fund country allocation, as well as from domestic resources, to sustain the gains made in recent years.

Progress

Ghana has secured sufficient resources for the essential anti-malarial commodities required to sustain coverage in 2016 and has achieved 100% operational coverage of vector control. The country has carried out insecticide resistance monitoring since 2014 and has reported the results to WHO. Ghana has scaled up coverage of iCCM. Ghana has further increased its already high rating in terms of public sector management systems (CPIA cluster D).

Impact

The annual reported number of malaria cases in 2015 was 10,186,510 with 2,137 deaths. WHO estimates that the country has achieved a decrease of 20-40% for malaria incidence rate and malaria mortality rate for the period 2010 - 2015.

Key Challenge

Insecticide resistance threatens vector control effectiveness.

Previous Key Recommended Action

| Objective | Action Item | Suggested completion timeframe | Progress | Comments - key activities/accomplishments since last quarterly report |
|-------------------|--|--------------------------------|----------|--|
| Vector control | Given the reported mosquito resistance to 4 classes of insecticide, urgently finalise and implement the national insecticide resistance monitoring and management plan | Q1 2017 | | Deliverable not yet due but the country has requested technical support in vector control |

New Key Recommended Action

| Objective | Action Item | Suggested completion timeframe |
|--------------------|--|--------------------------------|
| Address funding | Ensure the GF malaria funding application is submitted by Q2 2017 and ensure that resources are allocated to malaria control at a level that is sufficient to sustain the gains made in recent years | Q2 2017 |

MNCH

Progress

The country has achieved high coverage of tracer MNCH interventions, in particular DPT3 vaccination, vitamin A, and postnatal care. The country has significantly enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn and Child Health Scorecard.

Previous Key Recommended Actions

| Objective | Ac | tion Item | Suggested completion timeframe | Progress | Comments - key activities/accomplishments since last quarterly report |
|---|----|--|--------------------------------|----------|---|
| MNCH ¹ : Optimise quality of care | a) | Identify and address reasons for decreasing vitamin A coverage | Q3 2017 | | Deliverable not yet due |
| | b) | Identify and address reasons for decreasing DPT3 coverage | Q3 2017 | | Deliverable not yet due |

Ghana has responded positively to the MNCH recommended action addressing the low coverage of ARTs in the general population and in children and continues to track progress as these actions are implemented.
