Mozambique ALMA Quarterly Report Quarter Four, 2017

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control		
LLIN financing 2017 projection (% of need)	100	
Public sector RDT financing 2017 projection (% of need)	100	
Public sector ACT financing 2017 projection (% of need)	100	
World Bank rating on public sector management and institutions 2016 (CPIA Cluster D)	3.2	

Insecticide Resistance Monitoring, Implementation and Impact

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2016)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in malaria incidence rate (2010–2016)	

Tracer Indicators for Maternal and Child Health and NTDs		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2016)	18	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2016)	54	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2016)	38	
% deliveries assisted by skilled birth attendant	54	
Postnatal care (within 48 hrs)		
Exclusive breastfeeding (% children < 6 months)	41	
Vitamin A Coverage 2015 (2 doses)	99	
DPT3 coverage 2016 (vaccination among 0-11 month olds)	96	

Key

Target achieved or on track Progress but more effort required Not on track No data Not applicable

Malaria transmission is seasonal in almost all areas of Mozambique. The annual reported number of malaria cases in 2016 was 8,520,376 with 1 685 deaths.

Malaria

Progress

Mozambique secured sufficient financing to sustain universal coverage of ACTs, RDTs, and LLINs in 2017 and has procured sufficient LLINs to achieve 100% operational coverage of vector control. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Mozambique has also completed the national insecticide resistance monitoring and management plan. Mozambique has also scaled up implementation of iCCM. The country has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard.

Impact

The annual reported number of malaria cases in 2016 was 8,520,376 with 1,685 deaths.

Key Challenges

- High staff turnover in recent years is affecting programme efficiency.
- There is a need to strengthen cross border collaboration with neighbouring countries.

MNCH and NTDs

Progress

Mozambique has achieved high coverage of the tracer MNCH interventions vitamin A and DPT3. The country has significantly enhanced the tracking and accountability mechanisms with the development of the Reproductive, Maternal, Newborn, Adolescent and Child Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Mozambique is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Mozambique is high for schistosomiasis (93%). Coverage is good for lymphatic filariasis (74%), 57% for soil transmitted helminths and 45% for trachoma. Coverage is low for onchocerciasis (0%). Overall, the NTD preventive chemotherapy coverage index for Mozambique in 2016 is 18, which represents a substantial increase compared with the 2015 index value (1).

Previous Key Recommended Actions

Mozambique has responded positively to the MNCH recommended actions addressing low coverage of ARTs in children and the lack of data on postnatal care and continues to track progress as these actions are implemented.

Objective	Action Item	Suggested completion timeframe
NTDs	Given the good coverage achieved in Soil Transmitted Helminths (STH), Schistosomiasis, Trachoma, and Lymphatic Filaraisis Preventive Chemotherapy (PC), confirm the status of Onchocerciasis transmission and undertake Onchocerciasis elimination mapping, starting at the Malawi border	Q4 2018

New Key Recommended Action
