# **Mozambique ALMA Quarterly Report Quarter One, 2019**

## **Scorecard for Accountability and Action**

			c	

Commodities Financed and Financial Control		
LLIN financing 2019 projection (% of need)		82
Public sector RDT financing 2019 projection (% of need)		100
Public sector ACT financing 2019 projection (% of need)		59
Norld Bank rating on public sector management and institutions 2017 (CPIA Cluster D)		3.1
nsecticide Resistance Monitoring, Implementation ar	nd l	Impact
nsecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		;
nsecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
Scale of Implementation of iCCM (2017)		
Operational LLIN/IRS coverage (% of at risk population)		100
Change in Estimated Malaria Incidence(2010-2017)		
Change in Estimated Malaria Mortality rate(2010–2017)		
Tracer Indicators for Maternal and Child Health and N	ITE	)s
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)		12
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)		54
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)		51
% deliveries assisted by skilled birth attendant		54
Postnatal care (within 48 hrs)		
Exclusive breastfeeding (% children < 6 months)		41
Vitamin A Coverage 2016 (2 doses)		58

Malaria transmission is seasonal in almost all areas of Mozambique. The annual reported number of malaria cases in 2017 was 8,993,352 with 1,114 deaths.

## Key

# **Mozambique ALMA Quarterly Report Quarter One, 2019**

### Malaria

#### **Progress**

Mozambique secured sufficient financing to sustain universal coverage of LLINs and RDTs in 2019 and has carried out sufficient IRS and procured sufficient LLINs to achieve 100% operational coverage of vector control. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Mozambique has also completed the national insecticide resistance monitoring and management plan. Mozambique has also scaled up implementation of iCCM. The country has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard. The country is also showing leadership in malaria control through its participation in the High Burden High Impact Approach.

#### **Impact**

The annual reported number of malaria cases in 2017 was 8,993,352 with 1,114 deaths.

#### **Key Challenges**

- There is a need to strengthen cross border collaboration with neighbouring countries.
- The country has been adversely affected by the recent cyclone Idai.

#### **New Key Recommended Action**

Objective	Action Item	Suggested completion timeframe
Impact	Work to ensure that the recent cyclone does not impact negatively on the malaria situation	Q4 2019

### **RMNCAH and NTDs**

#### **Progress**

The country has significantly enhanced the tracking and accountability mechanisms with the development of the Reproductive, Maternal, Newborn, Adolescent and Child Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Mozambique is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Mozambique is high for soil transmitted helminths (87%) and for lymphatic filariasis (80%). Coverage is low for schistosomiasis (32%), and for trachoma (0%). Overall, the NTD preventive chemotherapy coverage index for Mozambique in 2017 is 12, which represents a decrease compared with the 2016 index value (18).

**Previous Key Recommended Actions** 

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
RMNCAH¹: Optimise quality of care NTDs	Investigate and address the reasons for the reported decrease in vitamin A coverage Identify the reasons for	Q2 2019 Q4 2019		Deliverable not yet due  The country conducted one
NIDS	the decrease in Preventive Chemotherapy (PC) coverage of Schistosomiasis and Trachoma. Work to address the causes of underperformance to achieve WHO PC coverage targets for Lymphatic Filariasis, Schistosomiasis, Soil Transmitted Helminths and Trachoma	Q4 2019		round of Preventive Chemotherapy targeting Lymphatic Filariasis, Onchocerciasis, Soil Transmitted Helminths, Schistosomiasis and Trachoma in 2018 and data will be submitted to WHO. A round of PC is planned in 2019. Regarding Onchocerciasis, the country is still in the process of getting the mapping protocol approved; and the mapping is planned in some non- endemic districts for lymphatic filariasis. The country is also planning to conduct the impact assessment for Lymphatic Filariasis and Trachoma but is still facing the issue of limited funds for Schistosomaiais and Soil Transmitted Helminth interventions

Mozambique has responded positively to the RMNCAH recommended action addressing the lack of data on postnatal care and continues to track progress as these actions are implemented.
