

Nigeria ALMA Quarterly Report Quarter Three, 2018

Scorecard for Accountability and Action

Malaria transmission in Nigeria takes place all year round in the south but is more seasonal in the northern regions. The annual reported number of malaria cases in 2016 was 16,696,308 cases.

Metrics

Commodities Financed and Financial Control		
LLIN financing 2018 projection (% of need)	64	
Public sector RDT financing 2018 projection (% of need)	93	
Public sector ACT financing 2018 projection (% of need)	26	
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)	2.8	
Insecticide Resistance Monitoring, Implementation and Impact		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4	
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
Scale of Implementation of iCCM (2017)		
Operational LLIN/IRS coverage (% of at risk population)	67	
Reduced Malaria Incidence by >40% by 2020 (vs 2015) (projected)		
Tracer Indicators for Maternal and Child Health and NTDs		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2016)	48	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)	33	
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)	26	
% deliveries assisted by skilled birth attendant	43	
Postnatal care (within 48 hrs)	37	
Exclusive breastfeeding (% children < 6 months)	23	
Vitamin A Coverage 2016 (2 doses)	56	
DPT3 coverage 2017 (vaccination among 0-11 month olds)	42	

Key

Green	Target achieved or on track
Yellow	Progress but more effort required
Red	Not on track
Grey	No data
White	Not applicable

Malaria

Progress

Nigeria has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO and has recently finalised the development of the national insecticide resistance monitoring and management plan. Nigeria has enhanced the tracking and accountability mechanisms for malaria with the development of the Malaria Control and Elimination Scorecard

Impact

The annual reported number of malaria cases in 2016 was 16,696,308.

Key Challenges

- Funding gaps to achieve and sustain universal coverage of all malaria interventions in 2018-2020.
- Mobilising sufficient domestic resources to meet the Global Fund incentive funding requirements.

MNCH and NTDs

Progress

Progress in addressing Neglected Tropical Diseases (NTDs) in Nigeria is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in Nigeria is 54% for lymphatic filariasis, 67% for onchocerciasis, 57% for schistosomiasis, 33% for soil transmitted helminths and 37% for trachoma. Overall, the NTD preventive chemotherapy coverage index for Nigeria in 2016 is 48, which represents a substantial increase compared with the 2015 index value (15).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ¹ : Optimise quality of care	a. Work to accelerate coverage of ARTs in the total population and in children under 14 years of age	Q1 2017		Nigeria has increased ART coverage in the total population by 2%. Nigeria has developed a national paediatric ART acceleration plan aligned to 90-90-90 (2016-2018/9) and has shifted policy to Test-and-Treat for all children and Option B+ for PMTC T. HIV programme integration is ongoing within routine child health care tools for iCCM. The planned prevalence survey in 2018 will allow better targeting and programming moving forward

¹ MNCH metrics, recommended actions and response tracked through WHO MCA

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ¹ : Optimise quality of care	b. Investigate and address the reasons for the decreasing coverage of postnatal care	Q4 2018		Deliverable not yet due
	c. Investigate and address the reasons for the reported decrease in vitamin A coverage	Q2 2019		Deliverable not yet due

Nigeria has responded positively to the MNCH recommended actions addressing low coverage of skilled birth attendants and exclusive breastfeeding, and continues to track progress as these actions are implemented.
