South Sudan ALMA Quarterly Report Quarter Four, 2018

Scorecard for Accountability and Action

UGÀ

Metrics

Commodities Financed and Financial Control		
LLIN financing 2018 projection (% of need)	100	
Public sector RDT financing 2018 projection (% of need)	60	
Public sector ACT financing 2018 projection (% of need)	100	
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)	1.4	

Insecticide Resistance Monitoring, Implementation and Impact

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	<i>.</i>
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of ICCM (2017)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in Estimated Malaria Incidence(2010–2017)	
Change in Estimated Malaria Mortality rate(2010–2017)	

Tracer Indicators for Maternal and Child Health and NTDs

Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	1
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)	13
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)	9
% deliveries assisted by skilled birth attendant	19
Postnatal care (within 48 hrs)	
Exclusive breastfeeding (% children < 6 months)	45
Vitamin A Coverage 2016 (2 doses)	67
DPT3 coverage 2017 (vaccination among 0-11 month olds)	26

Key

Target achieved or on track Progress but more effort required Not on track No data Not applicable

Malaria transmission in South Sudan is generally perennial, with moderate to high intensity. The annual reported number of malaria cases in 2017 was 3,602,208 and 3,483 deaths

Malaria

Progress

The country secured sufficient resources to achieve universal coverage of LLINs and ACTs in 2018. The country has also distributed sufficient LLINs to achieve universal operational coverage. South Sudan has recently completed the insecticide resistance monitoring and management plan.

Impact

The annual reported number of malaria cases in 2017 was 3,602,208 and 3,483 deaths.

Key Challenge

• The lack of resources in the GF malaria allocation compared to previous allocations.

Previous Key Recommended Actions

South Sudan has responded positively to the recommended action on insecticide resistance monitoring.

MNCH and NTDs

Progress in addressing Neglected Tropical Diseases (NTDs) in South Sudan is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in South Sudan is 15% for onchocerciasis, 7% for lymphatic filariasis, 5% for trachoma, 0% for schistosomiasis and 0% for soil transmitted Helminths. Overall, the NTD preventive chemotherapy coverage index for South Sudan in 2017 is 1, which represents a slight decrease compared with the 2016 index value (3).

Previous Key Recommended Actions

South Sudan has responded positively to the recommended actions addressing low coverage of skilled birth attendants and DPT3, decreasing Vitamin A coverage and the lack of data for postnatal care. The country continues to track progress as these actions are implemented. The country has recently increased coverage of DPT3.

Objective	Action Item	Suggested completion timeframe
NTDs	Identify the reasons for low coverage and fluctuating implementation of preventive chemotherapy. Build a consistent preventive chemotherapy programme for all five endemic diseases, with annual high coverage implementation in all risk groups as recommended by WHO	Q4 2019

New Key Recommended Action
