

Scorecard for Accountability and Action

Malaria is endemic in all parts of the United Republic of Tanzania, with seasonal peaks. The annual reported number of malaria cases in 2017 was 5,597,715 with 3,685 deaths.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2018 projection (% of need)	100
Public sector RDT financing 2018 projection (% of need)	100
Public sector ACT financing 2018 projection (% of need)	100
World Bank rating on public sector management and institutions 2017 (CPIA Cluster D)	3.4
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4
Insecticide resistance monitored since 2015 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2017)	
Operational LLIN/IRS coverage (% of at risk population)	100
Change in Estimated Malaria Incidence(2010–2017)	
Change in Estimated Malaria Mortality rate(2010–2017)	
Tracer Indicators for Maternal and Child Health and NTDs	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2017)	▲ 88
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2017)	66
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2017)	46
% deliveries assisted by skilled birth attendant	64
Postnatal care (within 48 hrs)	34
Exclusive breastfeeding (% children < 6 months)	59
Vitamin A Coverage 2016 (2 doses)	89
DPT3 coverage 2017 (vaccination among 0-11 month olds)	97

Malaria

Progress

The United Republic of Tanzania secured sufficient resources to sustain universal coverage of LLINs, ACTs, and RDTs in 2018, and the country has procured sufficient LLINs to achieve 100% operational coverage. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO and has completed the national insecticide resistance monitoring and management plan. In addition, the United Republic of Tanzania has a high rating in terms of public sector management systems (CPIA cluster D). The country has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard.

Impact

The annual reported number of malaria cases in 2017 was 5,597,715 with 3,685 deaths.

Key Challenges

- Maintaining malaria high on the political and funding agenda on the island of Zanzibar as the burden continues to drop.
- The limited resources in the GF malaria allocation compared to previous allocations.

Previous Recommended Action

The United Republic of Tanzania has responded positively to the recommended actions addressing iCCM and continues to track progress as this action is implemented.

MNCH and NTDs

Progress

The United Republic of Tanzania has also made progress on tracer MNCH interventions including vitamin A, DPT3, and exclusive breastfeeding, and has recently increased coverage of ARTs in the total population. The country has significantly enhanced the tracking and accountability mechanisms with the development and launch of the Tanzania Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard, and with the development of the multi-sectoral nutrition scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in the United Republic of Tanzania is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, soil transmitted helminths and trachoma. Preventive chemotherapy coverage in United Republic of Tanzania is high for schistosomiasis (100%), soil transmitted helminths (94%), lymphatic filariasis (84%), trachoma (82%) and onchocerciasis (81%). Overall, the NTD preventive chemotherapy coverage index for United Republic of Tanzania in 2017 is 88, which represents a very substantial increase compared with the 2016 index value (44).

Previous Recommended Action

The United Republic of Tanzania has responded positively to the MNCH recommended actions addressing low coverage of postnatal care and continues to track progress as these actions are implemented.
