

### Scorecard for Accountability and Action

Malaria transmission ranges from unstable and epidemic in Puntland and Somaliland to moderate in central Somalia to high in the south. The annual reported number of malaria cases in 2021 was 50,648 and 0 deaths.

#### Metrics

Commodities Financed	
LLIN financing 2023 projection (% of need)	100
Public sector RDT financing 2023 projection (% of need)	100
Public sector ACT financing 2023 projection (% of need)	100

Policy	
Signed, ratified and deposited the AMA instrument at the AUC	Not on track
Malaria activities targeting refugees in Malaria Strategic Plan	Target achieved or on track
Malaria activities targeting IDPs in Malaria Strategic Plan	Target achieved or on track
Zero Malaria Starts With Me Launched	Not on track
End Malaria Council and Fund Launched	No data

Resistance Monitoring, Implementation and Impact	
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO	Target achieved or on track
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	3
Insecticide resistance monitored since 2015 and data reported to WHO	Not on track
National Insecticide Resistance Monitoring and Management Plan	Target achieved or on track
RDTs in stock (>6 months stock)	No data
ACTs in stock (>6 months stock)	No data
LLIN/IRS campaign on track	No data
Operational LLIN/IRS coverage (% of at risk population)	37
On track to reduce case incidence by ≥40% by 2021 (vs 2015)	Not on track
On track to reduce case mortality by ≥40% by 2021 (vs 2015)	Progress but more effort required

Tracer Indicators for Maternal and Child Health, NTDs and Covid 19	
Scale of Implementation of ICCM	Progress but more effort required
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2021)	0
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2022)	No data
Vitamin A Coverage 2021 (2 doses)	No data
DPT3 coverage 2022 (vaccination among 0-11 month olds)	42

#### Key

Target achieved or on track	Target achieved or on track
Progress but more effort required	Progress but more effort required
Not on track	Not on track
No data	No data
Not applicable	Not applicable

## Malaria

### Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. In this regard, Somalia has secured sufficient resources to procure the ACTs and RDTs required in 2023. The country has carried out drug resistance monitoring since 2018, and insecticide resistance monitoring since 2015 and has reported the results to WHO. The national strategic plan includes activities targeting refugees and IDPs.

### Impact

The annual reported number of malaria cases in 2021 was 50,648 and 0 deaths.

### Key Challenges

- A weak health system and relatively few partners limit scale up of core malaria interventions.

### Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Impact	Work to address low coverage of vector control	Q3 2023		Over 250,000 ITNs were distributed to the country in the last quarter
Policy	Sign, ratify and deposit the AMA instrument at the AUC	Q1 2023		No progress reported

Somalia has responded positively to the recommended actions addressing lack of insecticide resistance monitoring and continues to track progress as these actions are implemented.

## RMNCAH and NTDs

Progress in addressing Neglected Tropical Diseases (NTDs) in Somalia is measured using a composite index calculated from preventive chemotherapy coverage achieved for schistosomiasis, and soil transmitted helminthiasis. In 2021, preventive chemotherapy coverage was zero for both schistosomiasis and soil transmitted helminthiasis, and not reported for trachoma. Overall, the NTD preventive chemotherapy coverage index in 2021 is 0, which represents a very substantial decrease compared with the 2020 index value of 90

### Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
NTDs	Work to implement preventive chemotherapy for schistosomiasis, and soil transmitted helminthiasis and reach WHO targets	Q4 2023		In 2022, the country organized MDA into three different phases and is working on the reports. The country started trachoma prevalence survey in Q2 2023 and is conducting routine activities as planned.

Somalia has responded positively to the recommended actions addressing low coverage of ARTs in children under 14, and lack of data on vitamin A coverage and continues to track progress as these actions are implemented.
