

Scorecard for Accountability and Action

The entire population of Togo is at high risk of malaria. The annual reported number of malaria cases in 2021 was 996,364 and 809 deaths.

Metrics

Commodities Financed		
LLIN financing 2023 projection (% of need)		100
Public sector RDT financing 2023 projection (% of need)		100
Public sector ACT financing 2023 projection (% of need)		100
Policy		
Signed, ratified and deposited the AMA Instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Zero Malaria Starts With Me Launched		
End Malaria Council and Fund Launched		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		4
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)		100
On track to reduce case incidence by ≥40% by 2021 (vs 2015)		
On track to reduce case mortality by ≥40% by 2021 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of iCCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2021)		53
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2022)	▲	61
Vitamin A Coverage 2021 (2 doses)		96
DPT3 coverage 2022 (vaccination among 0-11 month olds)		82

Malaria

Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. In this regard, Togo has secured sufficient resources to fund the LLINs, RDTs and ACTs required in 2023. The country has distributed sufficient LLINs to achieve 100% operational coverage of the targeted at-risk population. Togo has finalised the national insecticide resistance monitoring and management plan and has reported the results of insecticide resistance monitoring and management plan.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Togo has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, although the scorecard is not yet shared on the ALMA Scorecard Hub. The country should consider establishing an End Malaria Council and Fund to enhance domestic resource mobilization and multi-sectoral action.

Impact

The annual reported number of malaria cases in 2021 was 996,364 and 809 deaths.

Key Challenge

- Insufficient resources to fully implement the malaria national strategic plan.

Previous Key Recommended Actions

Togo has responded positively to the recommended action on monitoring drug resistance and continues to track progress as this action is implemented.

RMNCAH and NTDs

Progress

Togo achieved high coverage of the tracer RMNCAH intervention vitamin A.

Progress in addressing Neglected Tropical Diseases (NTDs) in Togo is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, onchocerciasis, schistosomiasis, and soil transmitted helminths. In 2021, preventive chemotherapy coverage was 100% for lymphatic filariasis and for trachoma. The preventive chemotherapy coverage was 82% for onchocerciasis, 62% for soil transmitted helminths and 8% for schistosomiasis. Overall, the NTD preventive chemotherapy coverage index for Togo in 2021 is 53, which represents a very substantial decrease compared with the 2020 index value (86).
