Cabo Verde ALMA Quarterly Report Quarter One, 2016

Scorecard for Accountability and Action

Metrics

Commodities Financed and Financial Control		
IRS financing 2016 (% of at-risk population)	100	
Public sector RDT financing 2016 projection (% of need)	90	
Public sector ACT financing 2016 projection (% of need)	100	
World Bank rating on public sector management and institutions 2014 (CPIA Cluster D)	4.0	

Insecticide Resistance Monitoring, Implementation and Impact

Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	
Insecticide resistance monitored since 2014 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2013)	
IRS Operational Coverage (%)	
>75% Decrease in Malaria Incidence Projected 2000–2015	
Tracer Indicators for Maternal and Child Health	
Estimated % of Total Population living with HIV who	36

Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2014)	36
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2014)	
% deliveries assisted by skilled birth attendant	99
Postnatal care (within 48 hrs)	
Exclusive breastfeeding (% children < 6 m onths)	
Vitamin A Coverage 2013 (2 doses)	
DP T3 coverage 2014 (vaccination among 12-23 month olds)	91

In Cabo Verde, 58% of the population lives in areas where there is a low risk of malaria; the rest of the country is malaria-free. The annual reported number of malaria cases in 2014 was 46 with zero deaths.

Malaria

Progress

Cabo Verde has made great progress and has achieved significant impact in its malaria control programme, enabling the country to enter the pre-elimination phase of malaria control. The country has secured sufficient resources to sustain universal coverage of key malaria interventions in 2016. Cabo Verde was awarded a 2016 ALMA Award for Excellence for achieving the Millennium Development Goals (MDGs) target for malaria.

Impact

Malaria morbidity and mortality has declined in Cabo Verde. Total confirmed malaria cases decreased from 126 during 2000–2001 to 46 cases in 2014 and zero deaths. As such, the country has achieved the MDG international target of at least a 75% reduction in malaria burden since 2000.

Key Challenge

• Sustaining malaria control gains as the country prepares for elimination.

New Ney Neconimended Action			
Objective	Action Item	Suggested completion timeframe	
Vector Control	Report to WHO on the status of insecticide resistance, resistance monitoring and on the status of the national insecticide resistance monitoring and management plan	Q1 2017	

New Key Recommended Action

MNCH

Progress

The country has also achieved high coverage of the tracer MNCH interventions DPT3 vaccination and skilled birth attendants. Cabo Verde also has a high rating in terms of public sector management systems (CPIA cluster D).

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ^{1:} Optimise quality of care	Work towards improving postnatal care coverage through increasing availability of skilled care, promoting facility births where women and babies are observed for at least 24 hours before discharge and through home visits by Community Health Workers	Q1 2014		No progress reported

¹ MNCH metrics, recommended actions and response tracked through WHO MCA

Cabo Verde has responded positively to the MNCH recommended actions addressing lack of data on postnatal care, exclusive breastfeeding and vitamin A and continues to track progress as these actions are implemented.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
MNCH ¹ : Optimise quality of care	Work to accelerate coverage of ARTs and provide data on coverage in children under 14 years of age	Q1 2017
