

Scorecard for Accountability and Action

Malaria transmission occurs all year round throughout Côte d'Ivoire, although it is more seasonal in the north of the country. The annual reported number of malaria cases in 2014 was 4,658,774 with 2,069 deaths.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2016 projection (% of need)	100
Public sector RDT financing 2016 projection (% of need)	100
Public sector ACT financing 2016 projection (% of need)	100
World Bank rating on public sector management and institutions 2014 (CPIA Cluster D)	3.1
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	4
Insecticide resistance monitored since 2014 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2013)	
Operational LLIN/IRS coverage (% of at risk population)	100
>75% Decrease in Malaria Incidence Projected 2000–2015	
Tracer Indicators for Maternal and Child Health	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2014)	31
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2014)	16
% deliveries assisted by skilled birth attendant	59
Postnatal care (within 48 hrs)	70
Exclusive breastfeeding (% children < 6 months)	12
Vitamin A Coverage 2013 (2 doses)	99
DP T3 coverage 2014 (vaccination among 12-23 month olds)	67

	No data/Not applicable

Malaria

Progress

Côte d'Ivoire has successfully raised resources for the financing of the required number of LLINs, RDTs, and ACTs in 2016 and has procured enough LLINs to achieve universal coverage of LLINs in 2016.

Impact

The annual reported number of malaria cases in 2014 was 4,658,774 with 2,069 deaths. WHO, through modeling, estimates that there has been a less than 50% decrease in malaria incidence between 2000 and 2015.

Key Challenge

- Securing longer term resources for malaria programming.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Vector Control	Report the status of insecticide resistance monitoring to WHO and finalise and implement the national insecticide resistance monitoring and management plan	Q1 2017

MNCH

Progress

The country has made progress on tracer MNCH interventions, with high coverage of vitamin A and postnatal care.

Previous Key Recommended Actions

Côte d'Ivoire has responded positively to the MNCH recommended action addressing low coverage of exclusive breastfeeding, falling coverage of DPT3 and continues to track progress as this action is implemented.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
MNCH ¹ : Optimise quality of care	Work to accelerate coverage of ARTs especially in children under 14 years of age	Q1 2017

¹ MNCH metrics, recommended actions and response tracked through WHO MCA
