

Scorecard for Accountability and Action

The entire population of Guinea-Bissau is at risk of malaria. The annual reported number of malaria cases in 2014 was 98,952 with 357 deaths.

Metrics

Commodities Financed and Financial Control	
LLIN financing 2016 projection (% of need)	100
Public sector RDT financing 2016 projection (% of need)	100
Public sector ACT financing 2016 projection (% of need)	100
World Bank rating on public sector management and institutions 2014 (CPIA Cluster D)	2.2
Insecticide Resistance Monitoring, Implementation and Impact	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	
Insecticide resistance monitored since 2014 and data reported to WHO	
National Insecticide Resistance Monitoring and Management Plan	
Scale of Implementation of iCCM (2013)	
Operational LLIN/IRS coverage (% of at risk population)	100
>75% Decrease in Malaria Incidence Projected 2000–2015	
Tracer Indicators for Maternal and Child Health	
Estimated % of Total Population living with HIV who have access to antiretroviral therapy (2015)	26
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2015)	15
% deliveries assisted by skilled birth attendant	45
Postnatal care (within 48 hrs)	48
Exclusive breastfeeding (% children < 6 months)	53
Vitamin A Coverage 2013 (2 doses)	97
DPT3 coverage 2014 (vaccination among 0-11 month olds)	80

Malaria

Progress

Guinea-Bissau has made progress in scaling-up antimalarial interventions and secured sufficient resources to sustain coverage of ACTs, RDTs and LLINs in 2016. The country has distributed sufficient LLINs to achieve operational universal coverage.

Impact

The annual reported number of malaria cases in 2014 was 98,952 with 357 deaths. WHO, through modeling, projects that the country will achieve greater than 75% reduction in malaria incidence for the period between 2000 and 2015.

Previous Key Recommended Actions

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
Vector Control	Provide an update to WHO on mosquito insecticide resistance status, carry out insecticide resistance testing and develop and implement a national insecticide resistance monitoring and management plan	Q1 2017		Deliverable not yet due
Optimise quality of care	Scale up iCCM implementation country wide	Q1 2017		Guinea-Bissau is scaling up iCCM with support from partners including UNICEF, PMI and the Global Fund. Training in iCCM is rolling out to over 4,000 CHWs, including refresher training. These CHWs will be equipped with RDTs, ACTs, thermometers, antibiotics, ORS and zinc

MNCH

Progress

The country has also achieved high coverage of the tracer MNCH interventions of DPT3 and vitamin A coverage.

Previous Key Recommended Action

Objective	Action Item	Suggested completion timeframe	Progress	Comments - key activities/accomplishments since last quarterly report
MNCH ¹ : Optimise quality of care	Work to accelerate coverage of ARTs especially in children under 14 years of age	Q1 2017		Deliverable not yet due

¹ MNCH metrics, recommended actions and response tracked through WHO MCA
