

Scorecard for Accountability and Action

Malaria transmission occurs all year round throughout Côte d'Ivoire, although it is more seasonal in the north of the country. The annual reported number of malaria cases in 2021 was 7,633,965 with 1,276 deaths.

Metrics

Commodities Financed		
LLIN financing 2023 projection (% of need)		100
Public sector RDT financing 2023 projection (% of need)		100
Public sector ACT financing 2023 projection (% of need)		100
Policy		
Signed, ratified and deposited the AMA Instrument at the AUC		
Malaria activities targeting refugees in Malaria Strategic Plan		
Malaria activities targeting IDPs in Malaria Strategic Plan		
Zero Malaria Starts With Me Launched		
End Malaria Council and Fund Launched		
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO		
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010		4
Insecticide resistance monitored since 2015 and data reported to WHO		
National Insecticide Resistance Monitoring and Management Plan		
RDTs in stock (>6 months stock)		
ACTs in stock (>6 months stock)		
LLIN/IRS campaign on track		
Operational LLIN/IRS coverage (% of at risk population)		100
On track to reduce case incidence by ≥40% by 2021 (vs 2015)		
On track to reduce case mortality by ≥40% by 2021 (vs 2015)		
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of iCCM		
Mass Treatment Coverage for Neglected Tropical Disease (NTD Index, %)(2021)		57
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2022)		44
Vitamin A Coverage 2022 (2 doses)	▼	72
DPT3 coverage 2022 (vaccination among 0-11 month olds)		76

Malaria

Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. In this regard, Côte d'Ivoire has successfully raised resources for the financing of LLINs, RDTs, and ACTs in 2023 and has procured enough LLINs to achieve 100% operational coverage of the targeted at-risk population with LLINs. The country has also scaled up implementation of iCCM. There are sufficient stocks of ACTs and RDTs. Côte d'Ivoire has recently reported the results of insecticide resistance testing to WHO and has carried out drug resistance testing since 2018 and has reported the results to WHO. The national strategic plan includes activities targeting refugees. The country has launched the Zero Malaria Starts with Me campaign.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Côte d'Ivoire has enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Scorecard, however the scorecard is not yet shared through the ALMA Scorecard Hub. The country should consider establishing an End Malaria Council and Fund to enhance domestic resource mobilization and multi-sectoral action.

Impact

The annual reported number of malaria cases in 2021 was 7,633,965 with 1,276 deaths.

Previous Key Recommended Action

The country has responded to the recommended action addressing malaria incidence and continues to track progress as actions are implemented.

RMNCAH and NTDs

Progress

Côte d'Ivoire has enhanced tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard.

Progress in addressing Neglected Tropical Diseases (NTDs) in Côte d'Ivoire is measured using a composite index calculated from preventive chemotherapy coverage achieved for onchocerciasis, schistosomiasis, soil transmitted helminths, lymphatic filariasis and trachoma. Preventive chemotherapy coverage in Côte d'Ivoire is low lymphatic filariasis is low (25%), soil transmitted helminths (59%) and for trachoma (62%). Preventive chemotherapy coverage is very good for onchocerciasis (75%) and for schistosomiasis (85%). Overall, the NTD preventive chemotherapy coverage index for Côte d'Ivoire in 2021 is 57 and this represents a small decrease compared with the 2020 index value (59).

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Optimise quality of care	Address the falling coverage of vitamin A	Q4 2024
