

Scorecard for Accountability and Action

Malaria transmission in Kenya ranges from intense in lowland areas to unstable epidemic-prone in the highlands. The annual reported number of malaria cases in 2021 was 4,255,874 and 753 deaths.

Metrics

Commodities Financed		
LLIN financing 2023 projection (% of need)	 	80
Public sector RDT financing 2023 projection (% of need)	 	100
Public sector ACT financing 2023 projection (% of need)	 	100
Policy		
Signed, ratified and deposited the AMA instrument at the AUC	 ▲	
Malaria activities targeting refugees in Malaria Strategic Plan	 	
Malaria activities targeting IDPs in Malaria Strategic Plan	 	
Zero Malaria Starts With Me Launched	 	
End Malaria Council and Fund Launched	 	
Resistance Monitoring, Implementation and Impact		
Drug Resistance Monitoring Conducted (2018-2020) and data reported to WHO	 	
Insecticide classes with mosquito resistance in representative sentinel sites confirmed since 2010	 	4
Insecticide resistance monitored since 2015 and data reported to WHO	 	
National Insecticide Resistance Monitoring and Management Plan	 	
RDTs in stock (>6 months stock)	 	
ACTs in stock (>6 months stock)	 	
LLIN/IRS campaign on track	 	
Operational LLIN/IRS coverage (% of at risk population)	 ▼	78
On track to reduce case incidence by ≥40% by 2021 (vs 2015)	 	
On track to reduce case mortality by ≥40% by 2021 (vs 2015)	 	
Tracer Indicators for Maternal and Child Health, NTDs and Covid 19		
Scale of Implementation of iCCM	 	
Mass Treatment Coverage for Neglected Tropical Disease (NTD index, %)(2021)	 	11
Estimated % of children (0–14 years old) living with HIV who have access to antiretroviral therapy (2022)	 	85
Vitamin A Coverage 2022 (2 doses)	 	84
DPT3 coverage 2022 (vaccination among 0-11 month olds)	 	90

Malaria

Progress

The country continues to work on strengthening and maintaining health services following the devastating impact of the COVID-19 pandemic. In this regard, Kenya secured the resources required to procure required ACTs and RDTs in 2023. The country has carried out insecticide resistance monitoring since 2015 and has reported the results to WHO. Kenya has completed the national insecticide resistance monitoring and management plan. Kenya has launched the Zero Malaria Starts with Me campaign. The country is implementing iCCM.

In line with the priority agenda of the ALMA chair, His Excellency President Umaro Sissoco Embaló, Kenya has significantly enhanced the tracking and accountability mechanisms for malaria with the development of a Malaria Control and Elimination Scorecard and has posted the scorecard to the ALMA Scorecard Hub. The country received the ALMA Joyce Kafanabo Award for Innovation and Excellence during the AU Summit in February 2023. The country has also launched the End Malaria Council in 2021. The Kenya malaria youth army has also been launched.

Impact

The annual reported number of malaria cases in 2021 was 4,255,874 and 753 deaths.

Key Challenge

- Funding gaps to fully deliver the malaria national strategic plan.

Previous Key Recommended Action

Kenya has responded positively to the recommended action addressing drug resistance monitoring and continues to track progress as actions are implemented.

New Key Recommended Action

Objective	Action Item	Suggested completion timeframe
Impact	Work to address low coverage of vector control	Q4 2024

RMNCAH and NTDs

Progress

Kenya has achieved high coverage of the tracer RMNCAH intervention vitamin A and DPT3. The country has significantly enhanced the tracking and accountability mechanisms with the development of a Reproductive, Maternal, Newborn, Child and Adolescent Health Scorecard and has published it on the scorecard hub.

Progress in addressing Neglected Tropical Diseases (NTDs) in Kenya is measured using a composite index calculated from preventive chemotherapy coverage achieved for lymphatic filariasis, schistosomiasis, soil transmitted helminths and trachoma. In 2021, preventive chemotherapy coverage was 64% for schistosomiasis, 62% for trachoma, 42% for soil transmitted helminthiasis and 0% for lymphatic filariasis. Overall, the NTD preventive chemotherapy coverage index for Kenya in 2021 is 11, which represents a substantial decrease compared with the 2020 index value of 29. The country has significantly enhanced the tracking and accountability mechanisms with the development of an NTD Scorecard.
